

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.

Comment

The main reason for creating a "Pocket Parks" is to keep the City of Alexandria as a livable & esthetically pleasing city. It is totally in the spirit of many other good judgements our city management/council has shown.

Our proud city should not miss this unique opportunity to prevent another overcrowded forest of buildings.

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.

Petition to the Alexandria City Council

Purpose: We support preserving the green space at Braddock Metro locally known as the PBS Plaza Pocket Park from development by Bradley Gray, or others. Building on this land will lead to excess overcrowding and congestion, which we oppose. Because this parcel is under imminent threat of loss to development, it must be added promptly to the city's open-space acquisition plan. Therefore, we request that the city permanently restrict this land from private development, and acquire the entire property for green space preservation.
