2-24-07

We the undersigned endorse the following petition.

As residents of the Route 1 corridor (Patrick & Henry Streets), we object to the Braddock Road Metro Small Area Plan as written for reasons of traffic management. The projected density and resulting traffic flow are based on faulty assumptions and the result is that Route 1, as a residential and more importantly a safe street, using the words of Consultant Richardson, is "OUT OF CONTROL". This point is further confirmed in the Traffic Study prepared for the 621 Payne Street Condos/Townhouses.

Rapid transit/light rail on Route 1, as Commissioner Robinson announced (02/06/07), is not an acceptable solution for traffic problems that result from either implementation of the Braddock Metro Small Area Plan or poor planning generally.

We request that density be reduced to a level more consistent with a residential neighborhood.

We also request as a benefit of development the following: Wider sidewalks, Improved tree wells, Underground wiring (as per Charles Houston), Speed enforcement.

We would expect the same value given to our environmental health as the City has shown other Alexandria residents when fighting the problems of hazardous pollutants.
