**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.

**Petition to Deny the Request by Virginia Paving Company to Amend its Special Use Permit**

**BACKGROUND:** The Virginia Paving Company facility at 5601 Courtney Avenue in Alexandria, Virginia (VA Paving) filed an application to change its Special Use Permit (SUP) to allow it to double its production and to essentially operate its asphalt plant 24/7. Its current 1960 SUP limits its hours of operation to Saturdays and to weekday daylight hours, but not including holidays. VA Paving is located just west of Tucker Elementary School, Boothe Park and Cameron Station. Intensification of asphalt production in such an area is clearly inappropriate and unhealthy.

VA Paving has publicly admitted being in violation of its SUP since it bought the plant in 2001. VA Paving had to pay fines to the EPA in late 2004 for two violations of the Clean Water Act and was cited by the City of Alexandria (City) in October 2004 for 22 violations relating to, among other things, water discharge, the fire code and dumping of waste. Six of these 22 violations have not been remedied. We believe VA Paving is a public nuisance and a potential health and safety hazard and should not be allowed to increase its hours of operation or increase its annual production.

**PETITION:** For the foregoing reasons, the undersigned respectfully request that Alexandria's Mayor and City Council deny VA Paving's request to amend its SUP, fully enforce its current SUP and take prompt action to ensure that VA Paving is currently in compliance with all City and state environmental and safety regulations.
