Dear Rob,

On behalf of City Council, I would like to express our sincere thanks for all the hard work you put forth as well as the coordination efforts that you provided for the VRE work just recently completed on the King Street overpass project. It is now a much more pleasurable experience to walk under and drive beneath. However, City Council wanted me to inquire as to the status of the drainage improvement projects behind the abutment walls of the overpass itself. You may recall that we had spoken with Mayor Kerry Donley and Councilman Speck, when we met with U.S. Congressman Jim Moran, regarding this proposal. In addition, City Council's desire is to apply some sort of mural to an appropriate medium to the abutment wall itself. We understand that there would be a necessary permitting process. Please advise me of the process so that I can forward the information and have this effort coordinated through our Recreation, Parks and Cultural Activities Department.

Again, I thank you for all your efforts, it has been a pleasure working with you. I know that we will continue to enjoy our solid work relationship into the future.

Sincerely,

Richard J. Baier
Director
