### City of Alexandria, Virginia

<u>18</u> 3-9-10

#### **MEMORANDUM**

DATE:

**FEBRUARY 23, 2010** 

TO:

THE HONORABLE MAYOR AND MEMBERS OF CITY COUNCIL

FROM:

JAMES K. HARTMANN, CITY MANAGER

SUBJECT:

MONTHLY FINANCIAL REPORT FOR THE PERIOD ENDING

**JANUARY 31, 2010** 

ISSUE: Receipt of the City's Monthly Financial Report for the Period Ending January 31, 2010.

**RECOMMENDATION**: That City Council receive the following Monthly Financial Report for the Period Ending January 31, 2010.

<u>DISCUSSION</u>: This report includes highlights of the City's financial condition. More detailed information including economic information and charts, and revenue and expenditure charts and references are available with this report from the City of Alexandria web site at alexandriava.gov/financialreports. Also, the FY 2011 budget presented to City Council in February contains additional detail on forecasts for revenues for the remainder of FY 2010 and FY 2011. Since this report covers expenditures through January, the report does not reflect any of the costs for the February 2010 snowstorm. (Through Tuesday, February 16, those out-of-pocket costs were estimated to be about \$6.0 million for the City and \$1.3 million for the schools.)

#### **ECONOMIC HIGHLIGHTS:**

- The Gross Domestic Product (GDP) rose an annualized rate of 5.7% in the fourth quarter. However, consumption expenditures rose much more slowly at a 2% annualized rate, reflecting a slower recovery in consumer spending, which is about 70% of the GDP overall. Inventory replenishment may have driven the overall GDP increase.
- The City released its Calendar Year 2010 Assessments: Overall <u>equalized</u> assessments decreased by 6.83%, while residential assessments decreased by 5.17% and commercial assessments decreased by 7.03%. The weakest categories were office buildings and hotels, which decreased by 12.11% and 12.85%, respectively.
- The December snow storm had a significant effect on City revenues: A three month moving average of sales tax revenues was down by 1.8% compared to the previous year, due largely to a decrease in December sales tax revenues. The average room rate for a hotel room in December reached its lowest level since 2006. (The adverse tax revenue impact from the February snow event was estimated between \$1.4 million and \$1.7 million.)

#### **REVENUE HIGHLIGHTS:**

- Year-to-Date Revenues: As of January 31, 2010, actual General Fund revenues totaled \$274.3 million, which is 2.3 percent above FY 2009 revenues of \$268.2 million for the same period last year. The FY 2011 budget contains a revised estimate for FY 2010 revenues. That estimate shows a revenues shortfall of \$7.0 million or 1.3 percent compared to the original FY 2010 budget estimate of General Fund revenues of \$530 million, primarily due to lower real property revenues (due to lower assessments than previously forecast) and lower intergovernmental revenues. The revenue estimate shown in Online Reference 2 also includes the proposed 7 cent tax increase from 90.3 cents per \$100 to 97.3 cents per \$100 which would generate a net budget surplus of approximately \$3.9 million.
- **Personal Property Tax**: Revenues collected to date represent 98.4 percent of budgeted revenue. As indicated in the FY 2011 Proposed Budget, preliminary collections to date indicate revenues may exceed the budget by \$0.4 million. Any unlikely State reduction in its personal property tax relief subsidy would not occur until FY 2011 at the earliest.
- Local Sales and Use Taxes: The substantial increase in sales tax revenue is primarily related to one-time repayments in the prior year (FY 2009) to Fairfax County of \$1.5 million for sales tax collections from businesses with an Alexandria address that are actually located in Fairfax County. Excluding one-time repayments, year-over-year retail sales from July through December are flat.
- Charges for City Services: Increase in this category is largely due to greater year-to-date collections from parking meter receipts, refuse user charges, and ambulance fees.
- Revenue from the Use of Money and Property: Continued decreased revenue in this category reflects the extremely low interest rates budgeted and earned on City operating funds, which are conservatively invested for safety and liquidity reasons.

#### **EXPENDITURE HIGHLIGHTS:**

- Year-to-Date Expenditures: As of January 31, 2010, actual General Fund expenditures totaled \$263.7 million, a decrease of \$7.3 million, or 2.7 percent, below expenditures for the same period last year.
- Personnel and non-personnel costs: With 58.3 percent of the fiscal year completed, total expenditures are 49.1 percent of budget. Personnel costs are running exactly on budget, reflecting the fact that 56.7 percent of the FY 2010 payrolls have been processed by January 31, 2010. Non-personnel expenditures are 45.6 percent of the budget through the first seven months of the fiscal year. Typically, the City's non-personnel expenditures are at 44.8 percent of the budget through January, so this percentage is only slightly higher than what is expected through the first seven months of the year. (This estimate does not include most of the cost of the December snow event, at this time \$782,000, since we are still sorting out what portion of the cost will be reimbursed by the federal government.)
- **Debt Service**: The increase reflects budgeted debt service for bonds previously issued.

#### National, State, and Regional Economy

The headline Gross Domestic Product number increased by 5.7% in the 4<sup>th</sup> quarter, compared to an increase of 2.2% in the 3<sup>rd</sup> quarter.

#### **Change in Gross Domestic Product**

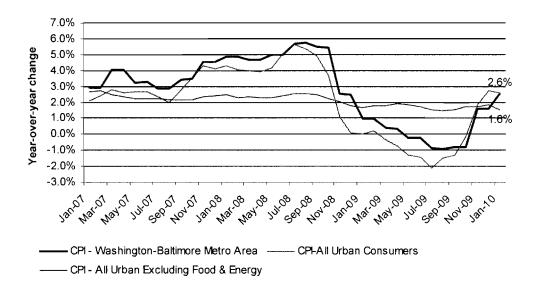

The increase was the largest since 2003. However, consumption expenditures rose only 2.0% during the quarter, slowing from a 2.8% increase during the 3<sup>rd</sup> quarter. In a recent speech, Atlanta Federal Reserve President Dennis Lockhart stated that he saw "two competing narratives about how this recovery will play out...in the first narrative – that of a traditional sharp bounce-back following a deep recession – growth exceeds the underlying long-term potential of the economy and unemployment declines at an accelerating pace...the alternative narrative entails some fundamental changes in business practices and consumer habits...Consumers, in this narrative, have assumed a quite different mind-set compared to the pre-crisis, prerecession "normal." Chastened by the recession and high unemployment, - consumers are simply more frugal and more inclined to save. And even if consumers wanted to resume prerecession spending habits, the consumer finance industry, in this narrative, will not accommodate previous levels of consumption...In this narrative, growth continues, but at a very modest pace, and unemployment is very slow to recede... My team of Atlanta Fed economists and I are forecasting the second narrative." The City's revenue projections for FY 2011 which were presented in the City Manager's Proposed budget on February 16, are predicated on the second narrative.

On the inflation front, the increase in the Washington-Baltimore Metro area's consumer price index (CPI) has converged with the national consumer price index. The CPI rose by 2.6% year-over-year in each, in large part due to increases in energy costs. Motor fuels, which make up around 4.5% of the index increased by over 50% year-over-year.

The consumer price index excluding food and energy rose at a more modest 1.6%. Housing, which makes up over 40% of the CPI-U, dipped by 0.5%.

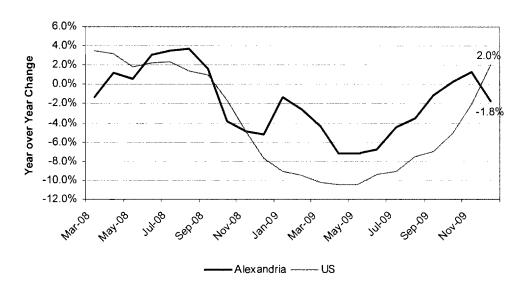

#### Annual Change in Consumer Price Index

#### Alexandria's Economy and Revenues

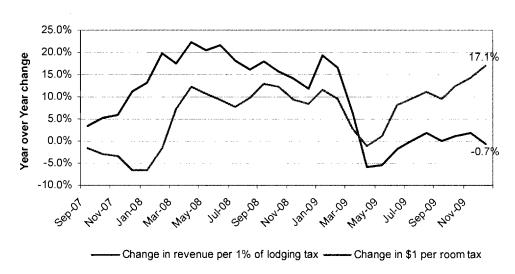

Alexandria's economy was affected by the snowstorm in December. The 3-month moving average of sales tax revenues compared to the previous year went negative in December for the first time since September 2009, even while the national year-over-year numbers went positive for the first time since September 2008.

## Annual Change in Retail Sales 3 month trailing average

In order to keep hotel rooms filled, Alexandria hotels have been deeply discounting rooms. While the number of occupied hotel rooms increased during the period from October through December compared to 2008, the average room rate decreased to a level only slightly above that of December 2006, despite the opening of several new high end hotels in the City since then.

## Annual Change in Transient Lodging Tax Receipts 3 month trailing average

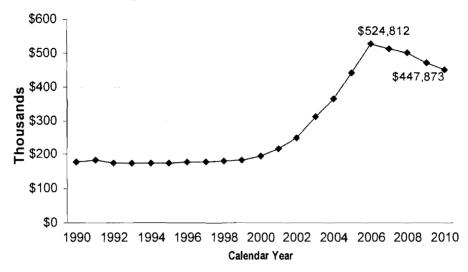

#### **Real Estate**

The City of Alexandria Calendar Year 2010 assessments were issued on February 16. Overall, unequalized assessments (before administrative or board review) decreased by 7.45% compared to CY 2009 assessments. That's a decrease of 5.46% in residential assessments and 10.64% in commercial property assessments. Equalized residential assessments (after administrative or board review) decreased by 5.17%, while commercial assessments decreased by 9.60%. Total equalized assessments including non-locally assessed property decreased by 6.83% compared to last year.

The condo market was especially hard hit, where the average assessment has decreased by over 25% since 2006, from \$364,286 to \$269,695. The average single family home has fared relatively better and has decreased only by around 8% since 2006, from \$669,299 to \$612,749.

The housing market in Alexandria has shown some recent strength.

The number of dwellings sold increased by over 30% during the last three months of 2009 compared to 2008. However, over the next several months, some of the supports for the housing market may begin to wind down. The Federal Reserve has completed some 95% of its purchases of mortgage backed securities which have reduced interest rates on mortgages. Estimates from various sources are that after the Fed ends its purchases of mortgage backed securities at the end of March, mortgage rates could rise between 0.25% to 1.0% above current rates. An improving economy and large federal budget deficits could also put upward pressure on rates. In addition, unless extended, the homebuyer tax credit program is scheduled to end by the end of April. To take advantage of the credit, buyers must purchase homes by the end of April and settle by the end of June. Finally, the federal government's program to prevent foreclosures appears to have served only to delay foreclosures rather than prevent them, as to date, relatively few borrowers have achieved permanently modified loans. The City has had relatively few foreclosures compared to other jurisdictions, but foreclosures may increase in the months to come. The question in the housing market is how much of the recent strength is due to massive support from the federal government and whether the strength is sustainable when and if the support comes to an end.

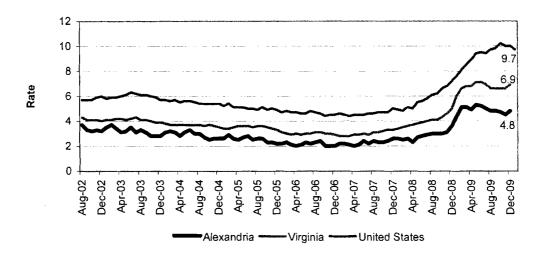

Commercial assessments decreased by the largest amount since the early 1990's. The categories experiencing the worst rate of decline were office buildings (-12.11%), and hotels (-12.85%). New construction was minimal and is not expected to increase over the next several years. Budget memo #3 contains detailed information regarding the City's commercial assessments and projections. The memo is available at: http://alexandriava.gov/budget/info/default.aspx?id=30274.

#### Intergovernmental

Governor McDonnell has formally issued a letter to legislators outlining new revenue projections and additional cuts to balance the biennium budget. The updated revenue projections have changed little from Governor Kaine's final projections, but they're not worsening. Governor McDonnell has proposed a continuation of funding for the car tax reimbursement which Governor Kaine had discontinued in his budget proposal. However, Governor McDonnell has offered some additional reductions which will affect Alexandria. The across-the-board cut to localities which had been eliminated in Kaine's budget has been restored by McDonnell which will reduce the City's revenue estimates from intergovernmental transfers by \$1.1 million. In addition, McDonnell proposed additional reductions to education and many social services. Staff will keep Council informed as additional information becomes available.
