

# The Alexandria of Our Future

A Livable Community for All Ages

*Strategic Plan on Aging, 2012-2016*

*DRAFT*

## Acknowledgements

JustPartners, Inc., expresses appreciation to the many Alexandrians who participated in the development of this Plan. In particular, we thank MaryAnn Griffin, Director of the Alexandria Division of Aging and Adult Services, and Debbie Ludington and Diana Reynoso from her staff; Jane King, Chair of the Alexandria Commission on Aging, and her colleagues; members of the Strategic Plan Advisory Group; the Aging Liaisons from the City's departments; Mayor William Euille and other elected and appointed officials who participated in discussions and town halls; Alexandria residents who offered their ideas through town halls, written input, and a public hearing; and the local organizations and volunteers who distributed information about the town hall meetings and staffed the events. Such mobilization of the community on behalf of its older residents is impressive. The Plan offered here demonstrates that a focus on the well-being of older residents can advance a livable community for *all* ages

JustPartners, Inc. is a Baltimore-based nonprofit consulting group whose Viable Futures Center ([www.viablefuturescenter.org](http://www.viablefuturescenter.org)) promotes age-inclusive communities, racial equity, and strategic solutions for tough times. Debbie Saag provided graphic design work for this document.

# Overview

*The premises on which this Strategic Plan is based are that:*

- *Older residents are a natural resource whose talents and contributions to the life of the City are fundamental to its health and vitality;*
- *Many attributes making a community more livable for older adults enhance its livability for all ages;*
- *Government alone cannot create the community that most older Alexandrians desire.*

*Many of the Objectives and Action Steps in this plan address more than one problem simultaneously, suggest the engagement of partners beyond the aging network, and meet the needs of younger residents and stakeholders as well as those who are older.*

---

Most Americans want to stay in their own homes and communities as they age. Alexandria offers attractive features in abundance that make the desire to age at home especially compelling. Its residents are proud of their City -- its diverse and distinct neighborhoods, distinguished history, plentiful restaurants, the Potomac waterfront, many shopping areas, parks and walkable streets, access to mass transit, celebration of the arts, small town character and a reputation for resident engagement.

For Alexandria and the nation, however, changing demographics are creating the imperative to plan for an aging population that will have doubled from the year 2000 to 2030. Many among the baby boomers, whose sheer numbers have changed the nature of our society from their adolescence to their aging years, expect their communities to adjust to their longer life spans, provide a variety of choices in key areas of life, support their ambition to work or volunteer in activities that are suitable for their expertise and experience, and accommodate their desire to continue active engagement in their neighborhoods and communities for many years to come.

Planning in the City acknowledges the diversity of its residents, who represent a range of incomes, educational attainment, nationalities, and racial and cultural heritages and speak many languages (at least 45).<sup>1</sup> In planning for aging residents, therefore, Alexandria must necessarily account for an extraordinary array of expectations and needs.

Fortunately, Alexandria is clearly attuned to the future. In recent years, the City Council has approved several strategic plans that incorporate innovative and comprehensive approaches to protecting the environment (the Eco-City Plan), enhancing access for all Alexandrians to a variety of modes of

---

transportation that lessen the use of automobiles (2008 Master Plan for Transportation), creating a state-of-the art school system (Alexandria City Schools Strategic Plan 2010-2015) and developing housing that meets the needs of Alexandria's very heterogeneous population (Housing Plan, in development). The City Council also approved a plan in 2010 that integrates many of the strategies and action steps defined in the individual plans.

These plans, as they are implemented, will benefit Alexandrians of all ages and abilities. However, the City Council agreed in May 2010 that the City could best address the needs and aspirations of its aging residents through a closer examination of the implications for Alexandria of their rapidly increasing numbers and the transformation occurring in the meaning of later life. As have other forward-thinking communities, Alexandria's leaders recognized that the numbers and accompanying expectations of its aging residents represent a new phenomenon in human history and authorized the development of a Strategic Plan on Aging. This Plan both complements the other City plans and seeks wherever possible to benefit Alexandria residents beyond the older population.

While their large numbers alone necessitate careful scrutiny of their impact on the community, many of the City's older residents, like their peers across the country, are healthier and more affluent and will stay active longer than prior generations. They want to stay in and give back to their communities. Their capacity to continue to serve their community as they age is unparalleled, as is their ability to contribute to its economic development.

At the same time, many older residents will need modifications to their homes to sustain their independence and will rely in their later years on modes of transportation other than the automobile. The City must accommodate and plan for those older Alexandrians who are or will be frail, disabled or ill and need in-home or institutional support, both for those who can afford to pay and those who cannot. For older Alexandrians, as for all residents, maintaining health and a good quality of life are essential goals.

As the population of Alexandria's 65-plus residents doubles, the constraints on budgets will make it impossible to double the resources available to older City residents. Alexandrians who volunteer, many of whom are older, already fill gaps in services and enhance the ability of their more vulnerable peers to continue to live independently in their homes. They deliver Meals on Wheels, provide care to older family members, support At Home Alexandria (AHA!), rehabilitate housing for Rebuilding Together, contribute to Senior Services of Alexandria and ALIVE!, assist older participants in faith-based communities and volunteer for a variety of other supportive services. Their volunteerism benefits other generations, as well.

Prior to developing this Plan, the views of a broad cross-section of Alexandria residents were solicited, to include older adults and boomers, and many stakeholders representing Alexandria government, non-profit and service organizations, faith-based institutions and business interests in the City. These views played a critical role in the determination of the Goals and Objectives set forth in the Plan. To frame and supplement the views of Alexandrians, JustPartners, Inc. (JPI) completed a comprehensive

scan of local, state and national data, trends, strategies and practices. Through this scan, JPI identified the experiences and approaches of other communities that contribute to an understanding of the strategic direction that will make Alexandria an especially attractive, desirable and livable community for all ages.

The vision of the Strategic Plan on Aging is as follows: ***Residents choose to stay in Alexandria as they age because it is a livable community for all ages.*** The Plan proposes seven interrelated goals that must be met to ensure this vision:

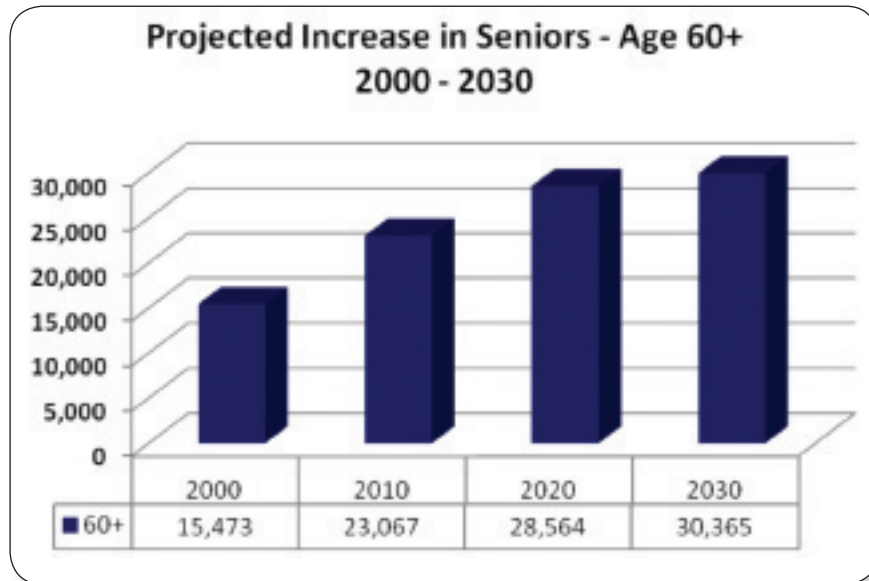

- **Goal #1. Communications and Outreach.** Information about services and programs is readily available and accessible in a variety of formats and venues for older residents of Alexandria, their families and caregivers, local organizations and businesses.
- **Goal #2. Housing.** A range of affordable, accessible and supportive housing is available that meets the needs of older residents of the City to be able to age at home.
- **Goal #3. Transportation.** A variety of mobility options, including pedestrian-safe streets, make moving in and around the City and region possible for Alexandrians of all ages and abilities.
- **Goal #4. Community Services.** Community services accommodate the expectations and needs of aging Alexandrians and support their caregivers.
- **Goal #5. Economic and Workforce Development.** The important contributions of older Alexandrians to the City's economy are recognized and the innovative entrepreneurship of older residents is encouraged.
- **Goal #6. Quality of Life.** The quality of life of all Alexandrians is enhanced by the many volunteer activities of its older residents and their continued involvement in the social and civic life of the City.
- **Goal #7. Health, Wellness, and Safety.** All residents, with special attention to lower-income older City residents, optimize their wellness and receive the health care they require.

# Chapter 1. Why a Strategic Plan on Aging Now?

## Seniors as a Growing Natural Resource

The large demographic bubble called the baby boom generation is starting to make waves in Alexandria. Thanks to boomers, between 2000 and 2030, the older population (60+) in Alexandria will double.<sup>2</sup>

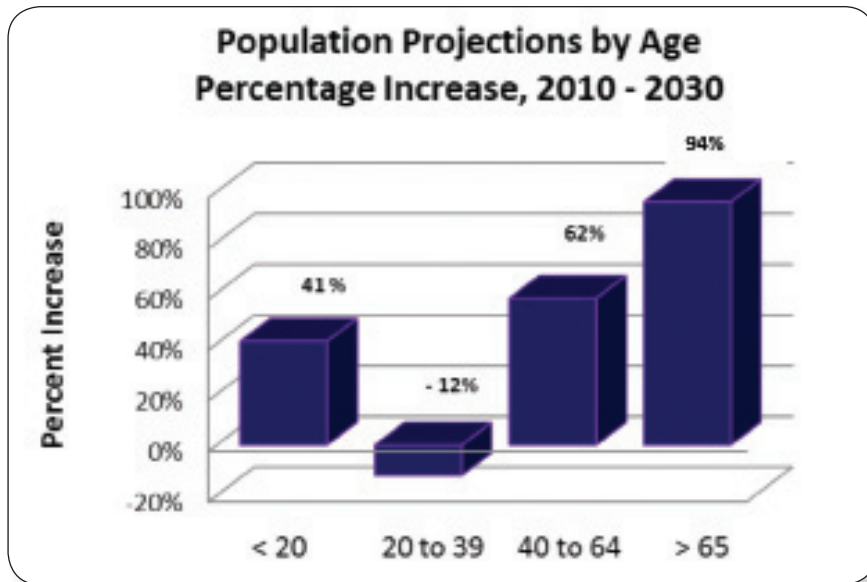

Source: Virginia Employment Commission Population Projections

A noted gerontologist points out that boomers don't just populate life stages – they transform them.<sup>3</sup> Nor do they just reside in communities – they can help to strengthen them. Successive generations of seniors will be healthier, remain civically engaged longer, and have considerable spending power. As the graph on the next page shows, seniors are the fastest growing natural resource in Alexandria!

<sup>2</sup> It should be noted that demographic forecasting for Alexandria is made cautiously. As pointed out by the Department of Planning and Zoning, "The cohort survival methods that may work to some extent for the region as a whole may not be useful for forecasting age cohorts within the City, which has a specialized role in the region's housing stock and labor market." Written communication, 4.25.11.

<sup>3</sup> [http://www.agewave.com/media\\_files/commonGround.pdf](http://www.agewave.com/media_files/commonGround.pdf), accessed 4.10.11.

## Alexandria as a Leader in Planning for Aging

In 2010 the City of Alexandria took leadership in anticipation of the growth in its older population by authorizing the development of a five-year Strategic Plan on Aging (hereafter referred to as the “Strategic Plan” or the “Plan”). By way of contrast, a survey by MetLife revealed that less than half of the 10,000 local governments it surveyed were prepared to address the needs and tap the potential of their growing older populations.<sup>4</sup> A 2009 survey by the Older Dominion Partnership found that only about half of local officials were aware of data about the aging of their community.<sup>5</sup> JustPartners, Inc. (JPI), a Baltimore-based consulting group with experience in Virginia and nationally in the promotion of “age-inclusive communities,” was selected to support the City in the development of this Strategic Plan.

While this Plan will contribute to the City of Alexandria becoming increasingly “senior-friendly,” the Division of Aging and Adult Services (DAAS) has already taken two critical steps to improve local understanding of the demographic changes. It created a group of Aging Liaisons from City Departments to enlist stakeholders throughout local government. These Liaisons represent an important bridge between DAAS and the many other governmental arenas where decision-making will need to take into account the growing older population. It has also created a Strategic Plan Advisory Group of representatives from various local sectors, age group interests, and issue constituencies for the purpose of information exchange and the exploration of collaborative opportunities. Along with the Commission on Aging, these new

<sup>4</sup> *The Maturing of America: Getting Communities on Track for an Aging Population*, [http://www.aginginplaceinitiative.org/storage/aipi/documents/maturing\\_of\\_america\\_reformatted\\_for\\_printing.pdf](http://www.aginginplaceinitiative.org/storage/aipi/documents/maturing_of_america_reformatted_for_printing.pdf), accessed 3.29.11.

<sup>5</sup> *Virginia’s Four-Year Plan for Aging Services*, 2009:20.

groups are becoming champions for creating a senior-friendly community that is also a livable community for all ages because they are positioned to recognize shared interests, overlapping concerns, and common aspirations across Alexandria’s age groups and other constituencies. Such a perspective is necessary for these challenging times.

The demographic changes facing Alexandria occur within the context of concerns about growth in government spending and the ability to sustain promises already made. Indeed, the June 2010 Alexandria City Council Strategic Plan noted:

*“... in the five years since the last {City} strategic planning effort concluded, much has changed. The national economic downturn has caused decline in the City’s financial condition. The pace of residential and commercial development is now only a fraction of that experienced a few years earlier, and the City’s ability to afford and deliver critical services in a changed fiscal environment dominates public discussion. Changes in conditions compel changes in strategy.” (p.4)*

The changes in strategy with which DAAS and JPI approached the development of this Strategic Plan include the following:

- 1.** The Plan takes into account the constraints on fiscal resources experienced by today’s local, state, and federal governments.
- 2.** The Plan is shaped by the aspiration of creating a “livable community for all ages” (described in Chapter 2) so that all ages can benefit from strategies that support seniors.
- 3.** The Plan strives both to align with, and offer concrete ideas to build out, the Strategic Plan of the City Council of Alexandria and other local strategic plans. In this way, organizational energies and resources can be maximized.

A brief description follows to position this Plan in the context of what is happening across the nation and in our state.

## The National and State Context

The aging of the U.S. population, including Alexandria's, is one of the key social forces of the early twenty-first century. Since the start of 2011, each day 10,000 baby boomers turn 65.<sup>6</sup> By 2030 the number of older adults in the U.S. population will have *doubled* to 71.5 million,<sup>7</sup> and one in every 5 Americans will be over 65. Like the U.S. population, Virginia's older population is expected to grow dramatically between 2000 and 2030 – doubling to 1.8 million by 2030.

Baby boomers, who are the emerging generation of seniors, arrive at later life in better health and with more education than previous generations, contribute half of all U.S. consumer spending,<sup>8</sup> and are interested in remaining engaged and active in the community as long as they can. More will continue to work, and they are expected to give more hours than other generations to volunteering. Communities across the nation are expanding services to current seniors to provide them with care at home when possible so that they can continue to live in the community.

In the seven decades since World War II and the baby boom, the U.S. has witnessed enormous changes in:

- our economic structure and what drives it – from an industrial society to an information and services-driven society today;
- the range of family structures and the geographic dispersal of family members (e.g., with smaller families<sup>9</sup> and residential mobility across family generations), which contribute to half of today's women 75+ living alone<sup>10</sup> and many having no family members nearby; and
- technologies to enhance personal and professional settings and individual care but many seniors and caregivers lacking skills or equipment to benefit from them.

<sup>7</sup> *The Maturing of America: Getting Communities on Track for an Aging Population*, [http://www.aginginplaceinitiative.org/storage/aipi/documents/maturing\\_of\\_america\\_reformatted\\_for\\_printing.pdf](http://www.aginginplaceinitiative.org/storage/aipi/documents/maturing_of_america_reformatted_for_printing.pdf), accessed 3.29.11.

<sup>8</sup> *Boomers Mean Business*, AARP Bulletin, March, 2001:20.

<sup>9</sup> Alexandria's average household size is only two people. [http://www.city-data.com/county/Alexandria\\_city-VA.html](http://www.city-data.com/county/Alexandria_city-VA.html), accessed 3.24.11.

<sup>10</sup> [http://www.aoa.gov/AoARoot/Aging\\_Statistics/Profile/2010/2.aspx](http://www.aoa.gov/AoARoot/Aging_Statistics/Profile/2010/2.aspx), accessed 3.24.11.

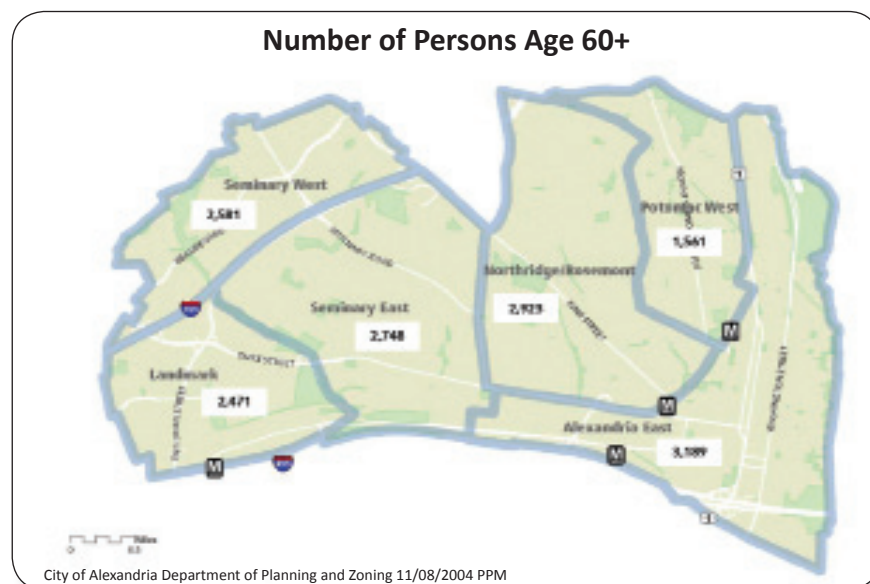

The arrival of the largest wave of the population to later life is causing social and economic challenges that impact national, state, and local governments. This emerging generation of seniors, unprecedented in numbers, is likely to:

- see the benefits and services it took for granted (e.g., Social Security, Medicare) up for political debate;
- live longer with chronic illnesses;
- watch healthcare, housing, and energy costs continue to rise;
- work longer due to financial need resulting from unexpected changes in (or lack of) retirement savings;
- provide support for their adult children and experience a “boomerang” effect when adult children move back home for financial reasons;
- rely more on paid caregivers (who will be more likely to speak English as a second language) if they have small families and if family members live farther away.

## A Snapshot of Older Alexandrians Today<sup>11</sup>

Here is a glimpse of Alexandria’s current senior population.

**Distribution of seniors.** The map below shows where persons over age 60 were living in 2000. All neighborhoods except Potomac West then housed at least 2,000 seniors, with Alexandria East showing the largest numbers (3000+).

Source: 2000 U.S. Census

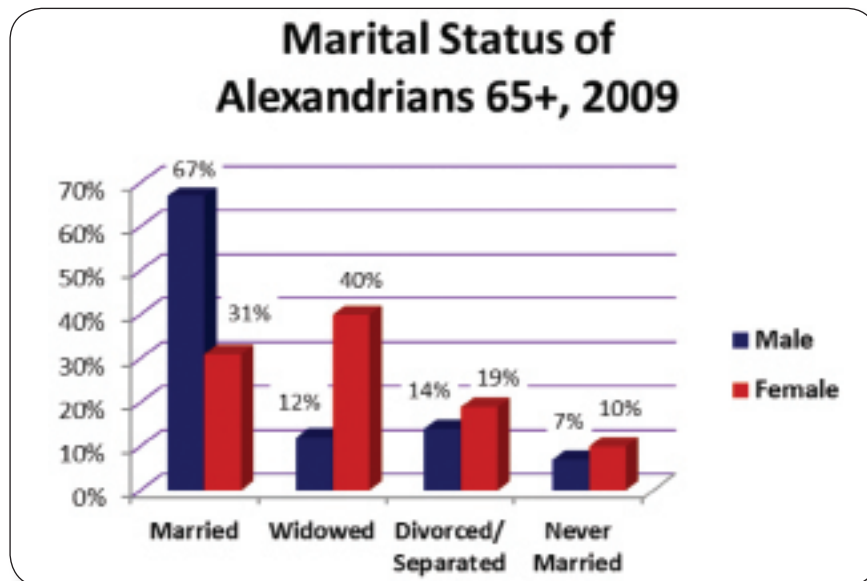

<sup>11</sup> Data provided are the latest available as of 3.24.11. These should be updated by the City when the 2010 Census data have been released for Alexandria.

**Race:** White (non-Hispanic) seniors made up the majority (73%) of Alexandria’s older population (age 60+) in 2000. Black seniors comprised 17% of the senior population. Successive older generations will be increasingly diverse and include more seniors with an original language other than English. Like many other cities, Alexandria’s senior population is majority White, and its school age population is comprised increasingly of children of color.

Source: 2000 U.S. Census

**Marital Status:** More male seniors age 65+ are married than are females, as is typical nationwide. Men tend to marry women who are younger, and men die at a younger age than women.

Source: 2005-2009 American Community Survey 5-Year Estimates

**Living Arrangements:** The majority of men 65+ live with family members, compared to only 11% of women 65+. A higher percentage (44%) of women 65+ live alone, compared to 23% of the men.

### Living Arrangements, Persons 65+, 2000

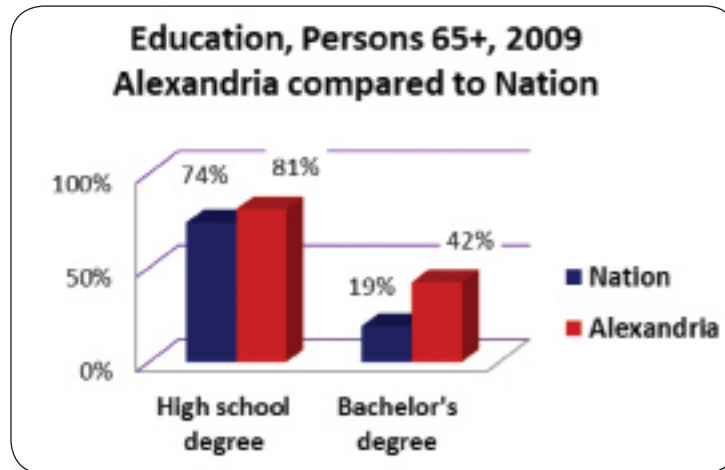

**Income.** At \$70,400, Alexandria’s median household income is higher than both the Virginia (\$59,330) and the U.S. median household incomes (\$50,221).<sup>12</sup> Alexandria’s senior households (65 and over) have incomes above both the state and the national median but slightly below the local median. Yet, a focus on overall median income overlooks the fact that senior incomes reflect “a tale of two cities.” In 2000, 45% of all senior households had incomes at or below the Department of Housing and Urban Development’s (HUD) moderate income limit, which was \$46,400 for a 2-person household and lower for someone living alone.<sup>13</sup> Because older women are more likely than older men to live alone, they are also more likely to have lower incomes.

Alexandria Income Data, 2010	
Age Group	Median Household Income
45 - 54	\$ 80,700
55 - 64	\$ 83,800
65 - 74	\$ 65,800
75+	\$ 62,800
<b>All Households</b>	<b>\$ 70,400</b>

<sup>12</sup> Alexandria’s median household income is reported in <http://www.realestate.com/VA/Alexandria/local-info.aspx>, accessed 3.25.11. The U.S. and VA median household incomes are for 2009, found at <http://www.census.gov/prod/2010pubs/acsbr09-2.pdf>, accessed 3.27.11.

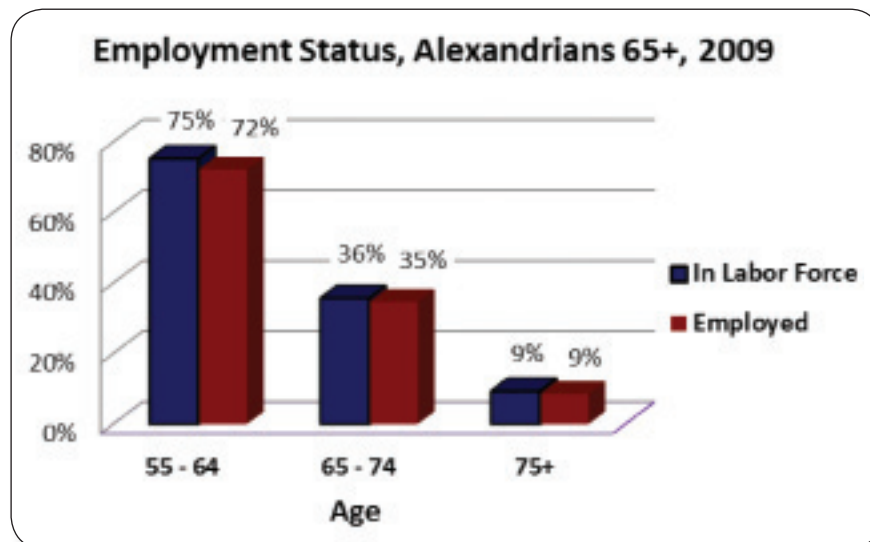

<sup>13</sup> <http://alexandriava.gov/uploadedFiles/housing/info/section1.pdf>, accessed 3.24.11.

**Education.** Alexandria seniors are better educated than seniors nationally, with 42% holding a bachelor’s degree -- over twice the national average.<sup>14</sup>

Source: 2005-2009 American Community Survey 5-Year Estimates

**Employment.** The Alexandria area appeared to offer sufficient employment opportunities for its older population in 2009 – although today’s economy may require revision of this conclusion. At the time, most senior Alexandrians who considered themselves in the labor force had jobs: 35% of seniors aged 65-74 held jobs, as did 9% of those 75+. Still, age discrimination in employment is an ongoing concern of the senior population. Further, these data do not reflect how employment may vary by race. Nationally, Black and Hispanic workers 50+ have been hit hardest by the economic downturn and stay unemployed longer. Compounding their situation is the fact that, in general, they have been unable to save as much – or save at all -- during their working years because of lower wages. Now, if they have savings, they are tapping these reserves earlier and for longer periods than their White counterparts.<sup>15</sup>

Source: 2005-2009 American Community Survey 5-Year Estimates

<sup>14</sup> In the chart “high school degree” includes both a high school diploma and a GED.

<sup>15</sup> <http://assets.aarp.org/rgcenter/econ/aa-workers-11.pdf>, accessed 3.27.11.

## Planning Opportunities and Challenges

The City of Alexandria has a number of assets and opportunities to be drawn upon when planning for aging:

- Other strategic plans in place throughout the City seek to ensure an overall quality of life for all residents, and their key focuses are amenable to specific implementation strategies to address older residents.
- The City is highly supportive of health and human services, including seniors and aging services.
- Many seniors have considerable spending power, and their needs and desires open up opportunities for local economic development.
- A critical mass of highly engaged older adults has a wealth of experience, expertise, and time that is already – and can continue to be – committed to advancing the City’s well-being.

At the same time, Alexandria, like other cities, faces some identifiable challenges. These can still offer opportunities for innovation, as the Objectives later in this report demonstrate:

- The lack of affordable housing threatens local hiring potential, compromises the eco-city aspiration in terms of closer linkage between work and home, undermines the City’s valuing of diversity, and exacerbates current transportation problems.
- The City’s growing older population will create a demand for moderate income health care workers and home-based aides who will also need affordable housing.
- The lack of sufficient senior independent and assisted living facilities impedes seniors’ ability to age in or near the City.
- The educational achievement of Alexandria youngsters – the next generation of workers, and future seniors -- lags behind the State, with 11% dropping out of school, although the on-time graduation rate is improving.<sup>16</sup>
- The City is seeking ways to respond to and include diverse newcomers to Alexandria, who represent at least 45 languages.

---

<sup>16</sup> <http://www.washingtonpost.com/wp-dyn/content/article/2010/12/18/AR2010121802566.html>, accessed 3.24.11.

Some issues may require regional problem-solving. Fortunately, many regional organizations are available as partners. The Metropolitan Washington Council of Government's 2010 *Region Forward* addresses what Alexandrians care about: accessibility, sustainability, prosperity, and livability. More specific to aging, Arlington County's *Elder Readiness Plan* and Fairfax County's *50+Plan* recognize similar planning challenges, some of which could be addressed through cross-jurisdictional collaboration, resource-sharing, or regional recruitment of service providers. Further, the Northern Virginia Aging Network's (NVAN) coordination of legislative priorities presents an ongoing opportunity for collective action that enriches local possibilities. NVAN has a strong track record that demonstrates how regional collaboration can advance local aspirations.

In many respects Alexandria represents the desired city of our future. Two large cohorts, baby boomers and their children, both want to live in communities that:

- favor transit-oriented growth;
- have high-density, walkable neighborhoods;
- are committed to mixed commercial-residential development;
- offer ready access to essential services and products; and
- have smaller homes available in economically vibrant and culturally rich cities.<sup>17</sup>

Alexandria has the opportunity – and the stated vision -- to offer this kind of community, a highly livable community, to diverse residents of all ages. This Strategic Plan on Aging contributes to that broad aspiration.

---

<sup>17</sup> [http://www.brookings.edu/articles/2010/11\\_real\\_estate\\_leinberger.aspx](http://www.brookings.edu/articles/2010/11_real_estate_leinberger.aspx), accessed 3.27.11.

## Chapter 2. What is a Livable Community for All Ages?

### An Age-Inclusive Approach

The vision of this five-year **Strategic Plan on Aging** is the following:

*Residents choose to stay in Alexandria as they age  
because it is a livable community for all ages.*

The anticipated doubling of Alexandria’s older population between 2000 and 2030 does not simply mean that current services and supports for older residents will need to be doubled. The current generation of seniors and the upcoming boomer generation have different experiences and different expectations about later life. This Strategic Plan ensures that the City is positioned to respond to both cohorts.

As already noted, localities are faced today with bigger challenges than before and fewer dollars to address them. This context requires a different kind of thinking and different kinds of actions by governmental agencies. The Division of Aging and Adult Services (DAAS) will want to diversify its revenue sources, partner further with other localities to share resources, and collaborate with programs serving younger populations in ways that meet future demands of multiple generations, particularly in light of the fiscal environment. That’s why this Plan seeks to place aspirations for the current and future generations of seniors squarely within the context of Alexandria’s vision for *all* residents. There is much to be gained by this approach – and too much to be lost without it.

A “livable community for all ages” is one where people at any age have:

1. Access to **information** about the opportunities and services available to enhance their quality of life.
2. Affordable **housing** that accommodates physical abilities and living arrangements, in safe, healthy and vibrant neighborhoods.
3. **Transportation** options, including pedestrian-friendly streets.
4. **Community services** that promote aging at home and provide caregivers with needed supports.
5. A thriving **economy** that creates jobs and provides many community amenities.
6. A good **quality of life** through opportunities for recreation, lifelong learning, civic participation, and intergenerational and cross-cultural interaction.
7. A focus on **wellness**, with **health care** and other supports as needed.

The Goals and Objectives detailed in Chapter 4 identify strategies for ensuring these elements for seniors that, with few exceptions, can also benefit other generations.

## The Multiplier Effect

This Strategic Plan on Aging is a plan for all Alexandrians because its effects are multiplied beyond seniors, as the chart on the next page previews. Objectives for older residents often work well for other ages, too. The optimal way to build a livable community for all ages in tight economic times is to prioritize strategies that simultaneously address more than one problem and/or serve more than one segment of the population. This Plan uses such an approach as it seeks to deliver a greater return on the investments made for seniors. Within a state of relative abundance, few communities were pressured to recognize how working in organizational or service silos reduced efficiencies and effectiveness. This Plan demonstrates how carefully chosen strategies can solve more than a single problem across issue areas and constituencies for local governments, organizations, and a wide range of residents. In the course of such work, coalitions typically emerge that further break down organizational silos, resources come to be shared more broadly for a greater good, and resident needs get addressed more holistically.

A 2008 needs assessment of human services in Alexandria<sup>18</sup> revealed a strong desire by human service personnel for further collaboration and the ability to speak with a collective voice. At the same time, human services clients expressed a strong interest in improved coordination of the City services available to them. This Plan supports those aspirations and works also to encompass a wide variety of City stakeholders beyond the human services.

The vision of this Strategic Plan on Aging is compatible with, and provides ways to achieve goals in, other City strategic documents. While everything within these core City documents applies to older residents as residents of the community, different age groups and diverse populations within each age group may be differently situated with regard to specific issues of city planning. Their varying circumstances require distinct considerations, which this Plan provides, so that everyone working to achieve the City's vision from their respective vantage points can appreciate the contributions made to their own planning by addressing issues of older residents.

In addition, this Plan utilizes the work already done by the State of Virginia, federal agencies, and nonprofit organizations around emerging issues of an aging population and livable communities for all ages. In this way, Alexandria's Strategic Plan on Aging is linked to collaborative opportunities, ideas, and resources elsewhere that can readily benefit Alexandria residents and accommodate their aspirations.

---

<sup>18</sup> <http://alexandriava.gov/uploadedFiles/humanservices/info/ACHSFinalNeedsAssessmentJuly2008.pdf>, accessed 3.29.11.

With this Plan, Alexandria is well positioned to take advantage of the changes underway at state and national levels.<sup>19</sup> Virginia is developing plans to design state policy and programs for seniors using the lens of livable communities for all ages. At the national level, efforts to break down issue silos, such as coordinating housing, transportation and environmental planning, also promise opportunities for better planning with greater returns at the local level.

In short, addressing issues of aging can, and must, be a win-win proposition. The strategies needed today must do more with less. They also must draw upon the considerable talents and energy of residents and the civic commitment found within neighborhoods and local organizations. The best problem-solving approaches will confront today's challenges with collaboration and ingenuity. This commitment guides the Strategic Plan on Aging.

<sup>19</sup> E.g., the Commonwealth of Virginia's *Four Year Plan for Aging Services* written in 2009 and its *Blueprint for Livable Communities* currently in draft form both use the lens of a livable community for all ages. The U.S. Department of Housing and Urban Development, the Department of Transportation, and the Environmental Protection Agency are advancing coordinated housing, transportation and environmental planning.

## Chapter 3. The Strategic Planning Process

The Strategic Planning process conducted by JustPartners, Inc. (JPI), in cooperation with the Division of Aging and Adult Services (DAAS), was designed to obtain a wide range of local input and information. The following steps were taken to ensure that local knowledge guided the Plan:

1. Creation of a local cross-sector **Strategic Plan Advisory Group**, whose 23 members represent stakeholders beyond the aging network (see Appendix C). They offered initial ideas about other constituencies' concerns that were considered throughout the Plan's development and provided valuable feedback on the initial draft of the Plan.
2. Two meetings with the 20 **Aging Liaisons** to the Division of Aging and Adult Services who work in other City Departments (see Appendix D). Their initial input about how their work would be impacted by the increase in the senior population helped to shape certain Objectives, and they provided valuable feedback on the initial draft of the Plan.
3. Meetings with the following **City officials** early in the planning process to obtain input and test initial ideas:
  - James Hartmann, City Manager
  - Mark Jinks, Deputy City Manager
  - Michele Evans, Deputy City Manager
  - Debra Collins, Assistant City Manager
  - Bruce Johnson, Chief Financial Officer
  - James Banks, City Attorney
  - Tony Castrilli, Director of Communications
  - Cheryl Orr, Director of Human Resources
  - Faroll Hamer, Director of Planning and Zoning
  - Councilwoman Redella S. "Del" Pepper

**4. Extensive outreach to solicit community input.** Thanks to the help of DAAS’s community partners, including AARP, the Commission on Aging, the Advisory Group, the Aging Liaisons, other organizations and groups, businesses, seniors and younger residents, and a promotional announcement by the Mayor, information about scheduled town hall meetings and cards for written input were sent or otherwise distributed to:

- 2,400 households with AARP members 55+;
- 10,000 residents 55+;
- 350 City Board and Commission members;
- 81 Retired Senior Volunteer Program (RSVP) members in Alexandria;
- 350 individuals/businesses serving seniors;
- 48 community organizations;
- 75 faith-based institutions;
- 100 commuters at Braddock metro station;
- frequently visited city locations – coffee houses, grocery stores, city buildings (distributing 1000 input cards and flyers in English and Spanish); and
- users of the City calendar, Facebook and eNews.

**5. Two town halls** that attracted almost 400 participants, mostly older residents, who shared their needs and aspirations. One of the town halls was held on February 23, 2011, at the Minnie Howard Campus of T.C. Williams High School and the other on March 3, 2011, at the First Baptist Church of Alexandria. The first session attracted about 150 residents; approximately 235 residents attended the second session. The meetings opened with a greeting from Mayor William Euille on March 3rd and Councilwoman Del Pepper on February 23rd. Jane King, Chair of the Commission on Aging, offered the charge for each event. Following an initial presentation at each session by the consulting team of JustPartners, Inc. about the framework of a Livable Community for All Ages, participants moved into smaller group discussions on transportation and safety, housing, health and wellness, community support, economic development, and quality of life.

The small groups first discussed considerations for Alexandria today and then focused on solutions for Alexandria that would: 1) advance the well-being of older residents, 2) also benefit other age groups or people with special needs, and 3) protect or support the environment, where applicable. After identifying solutions, participants then voted on the solutions they viewed as their top priorities. The voting results were shared with the full group. The final charge addressed the need for every resident of Alexandria to contribute to the city as a livable community for all ages and sought participants’ ongoing commitment to the work that the Strategic Plan on Aging would generate.

6. Receipt of **100 completed input cards** distributed throughout the City and collected following town halls to obtain resident comments; receipt of an additional **31 responses through an online survey**. Town hall participants received a form for providing open-ended written comments at the conclusion of the sessions. Residents using the input card were asked about (a) priorities for maintaining a high quality of life in Alexandria in the years ahead for all ages, and (b) ways in which seniors can use their time and talents to contribute to the City. Residents who completed the online survey (using Survey Monkey) responded to the same questions as those on the input card. The survey was posted on the City website for receipt of input for six weeks, from February 9 through March 23, 2011. The input cards and survey enabled respondents to give their age. A full 65% of respondents were 60 and over, while 35% of respondents were below 60 years of age.
7. **Online posting** of a draft plan for public comment from April 11 to 22, 2011, which produced 13 written responses.
8. A **public hearing** on the draft plan, conducted by the Commission on Aging on April 25, 2011, at the Nannie J. Lee Center.
9. Regular communications and testing of ideas with staff from the **Division of Aging and Adult Services** and members of the **Commission on Aging**.

To complement local knowledge, an **extensive environmental scan** was undertaken of local, state, and national data, trends, strategies, and practices relevant to the Plan.

## Chapter 4. Shaping the Alexandria of Our Future

In order to advance the vision that *Residents choose to stay in Alexandria as they age because it is a livable community for all ages*, this Plan proposes seven interrelated goals that must be met:

- **Goal #1. Communications and Outreach.** Information about services and programs is readily available and accessible in a variety of formats and venues for older residents of Alexandria, their families and caregivers, local organizations and businesses.
- **Goal #2. Housing.** A range of affordable, accessible and supportive housing is available that meets the needs of older residents of the City to be able to age at home.
- **Goal #3. Transportation.** A variety of mobility options, including pedestrian-safe streets, make moving in and around the City and region possible for Alexandrians of all ages and abilities.
- **Goal #4. Community Services.** Community services accommodate the expectations and needs of aging Alexandrians and support their caregivers.
- **Goal #5. Economic and Workforce Development.** The important contributions of older Alexandrians to the City's economy are recognized, and the innovative entrepreneurship of older residents is encouraged.
- **Goal #6. Quality of Life.** The quality of life of all Alexandrians is enhanced by the many volunteer activities of its older residents and their continued involvement in the social and civic life of the City.
- **Goal #7. Health, Wellness, and Safety.** All residents, with special attention to lower-income older City residents, optimize their wellness and receive the health care they require.

This Plan analyzes each Goal in light of the desire by seniors to age at home as long as possible, remain connected to the community, have appropriate services, supports, and facilities available when these are needed, and use their talents and time to enrich their lives and the lives of others. For each of the Goals under consideration, the following are provided:

- a brief review of considerations for Alexandria today, describing the issue;
- an inset box listing Alexandria's assets;
- a summary of community input;
- objectives and action steps to be undertaken to shape the Alexandria of our future;
- mention for each objective of other Alexandrians beyond the older population who would benefit from the objective's implementation; and
- a list of potential partners in the realization of the Goal.

# 1. Communications and Outreach

**Goal #1. Information about services and programs is readily available and accessible in a variety of formats and venues for older residents of Alexandria, their families and caregivers, local organizations and businesses.**

## Considerations for Alexandria Today

No aspect of Alexandria life is likely to be unaffected by the anticipated growth in the senior population. Alexandria already offers seniors a variety of services, supports, and opportunities. Still, residents have expressed the need to be more informed about what already exists.<sup>20</sup> As the inset box shows, Alexandrians have several “doors” to information and referral.<sup>21</sup> Data suggest that the “pull” approach of available services (i.e., information exists for those who seek it) may need to be complemented with an active “push” to get information out. Successful “push” efforts often rely on networks into which people are connected – their faith institutions, civic organizations, schools, and other community organizations and facilities – timed on a “need to know” basis. Further, to the extent that a senior-ready infrastructure within government and in public-private partnerships is created, as described in the chapter on Plan Implementation and Management, it is likely that information and referral functions will become more robust in that process. The capability to post information relevant to boomers and seniors on the home page of [www.alexandriava.gov](http://www.alexandriava.gov) in a timely way will contribute to overall information-sharing.

### Alexandrians can access information and referral services through:

- Department of Community and Human Services
- Division of Aging and Adult Services
- Senior Navigator
- No Wrong Door
- Eldercare Locator
- Senior Services of Alexandria

## The Input from Alexandria Residents

Regardless of the topic being addressed in the breakout sessions at the town hall meetings, participants invariably mentioned the need for more information about what Alexandria already offers for seniors. It was not uncommon for residents to make specific recommendations for what to include in the Plan, only to learn from another participant or the facilitator that such services, supports, or amenities already exist in the City. Beyond the general need for accurate and timely information, some participants mentioned the need for information to be available in languages other than English and more readily available in usual settings frequented by seniors. The need for translation services was also mentioned.

<sup>20</sup> <http://alexandriava.gov/uploadedFiles/humanservices/info/ACHSFinalNeedsAssessmentJuly2008.pdf>, accessed 3.29.11; also mentioned in town halls and input cards.

<sup>21</sup> The free Eldercare Locator listed in the inset box is a phone-based and website-based service of the U.S. Administration on Aging. Often it serves as a first step to finding resources for older adults in any U.S. community.

## The Alexandria of Our Future: Objectives and Action Steps

### Objective

FY to be Completed: 2012

**INFO 1.** An effective, robust communications and outreach plan – incorporating traditional strategies, creative ideas and modern technology – is developed that will inform, update, educate and actively refer Alexandria residents, businesses and organizations to services and programs available for older adults and their families.

#### Action Steps:

- Designate one Division of Aging and Adult Services staff member with lead responsibility for Communication and Outreach.
- Form a working group of City staff, senior and family-serving organizations, businesses and the faith community to identify previously successful outreach plans and determine ideas for successful communication and outreach on aging to an increasingly diverse older population.
- Meet with City Communications and IT staff to discuss possible changes to City web structure to simplify searching for information on aging.
- Finalize new edition of *Guide to Services for Older Alexandrians*. Print paper copies for distribution as well as posting on DAAS website.
- Coordinate/collaborate with other Information and referral resources such as Senior Services of Alexandria, Senior Navigator, 211, and Easy Access Virginia to maximize the dissemination of information.
- Utilize Facebook, Twitter, and other social media in addition to traditional methods of outreach. Engage tech-savvy youth to work with seniors who wish to develop their computer skills.
- Utilizing the concierge model,<sup>22</sup> train volunteers to visit senior residential communities, city facilities, Naturally Occurring Retirement Communities (NORCs), businesses and other community settings to provide information.
- Support the Eco-City Alexandria Environmental Action Plan by providing information for seniors and their caregivers about appropriate disposal of medication by, e.g., using the Dispose My Meds website<sup>23</sup> to locate a designated pharmacy in the area.
- Develop a presence on City and Chamber of Commerce web pages.

**Who Else Benefits:** All community residents + Potential newcomers.

#### Potential Partners For Information Outreach:

- All City departments
- Workplaces
- Media outlets
- Health care sector
- Faith organizations
- Neighborhood associations
- Nonprofits

<sup>22</sup> The concierge model is the customization of non-medical services and information, delivered to enable seniors to live independently.

<sup>23</sup> [www.disposemymeds.org](http://www.disposemymeds.org), accessed 5.19.11.

## 2. Housing

**Goal #2. A range of affordable, accessible and supportive housing is available that meets the needs of older residents of the City to be able to age at home.**

### Considerations for Alexandria Today

**Affordable housing.** The ability of seniors to age at home depends on the affordability of housing. Repeated City plans note that, increasingly, moderate- and lower-income Alexandrians, as well as those on a fixed income, are being priced out of the housing market. Between 2000 and 2007, Alexandria lost 10,000 affordable rental units and 16,500 affordable ownership units. In terms of publicly assisted housing, in 2011 the wait for public housing for the elderly is over five years long, and the wait for Section 8 vouchers is over 8 years.<sup>24</sup>

As the table below shows, Alexandria has seven senior resident facilities for independent living with a total of 1,024 units. Of these, 568 units serve lower-income seniors. A total of 456 units serve upper income seniors. None serves middle- or moderate- income seniors.

Senior housing providing independent living for middle, moderate and low income households is sorely needed. Mixed income senior housing in walkable neighborhoods near the Metro is particularly desirable.

Senior Independent Living Facilities by Income Level Served		
Facility Name	Income Level Served	Number of Units
Annie B. Rose House	Low	90
Beasley Square	Low	8
Claridge House II	Low	300
Fountains at Washington House	Upper	113
Goodwin House Alexandria	Upper	278
Hermitage	Upper	65
Ladrey Building	Low	170
<b>Total</b>		<b>1,024</b>

<sup>24</sup> ARHA reports that 31% of its public housing residents and 39% of its Section 8 Housing Choice Voucher participants are elderly or disabled. Public housing has 170 units for the elderly and a waiting list of 364 seniors. The 1422 Section 8 vouchers are available to all ages, and 752 applicants are on the waiting list. <http://alexandriava.gov/uploadedFiles/housing/info/PriorityHousingPresentationJanuary132011.pdf>, accessed 5.21.11. Housing Master Plan presentation, January 13, 2011

**Accessible housing.** To age at home requires environmental designs that enable independence as seniors' physical abilities change. Examples of accessibility indoors include the capability of single floor living, doorways wide enough to accommodate wheelchairs or walkers, and kitchen and bathroom facilities and appliances that are easy to reach and use. Outdoors, it could mean ramps to doorways or adaptations that support residents' varying abilities with regard to recycling and trash collection.

Trainings and checklists are available to builders and remodelers from the National Association for Home Builders (NAHB) to enable them to create accessible environments,<sup>25</sup> understand accessibility principles (known as "universal design" and "visitability") in housing construction and renovation, and become Certified Aging in Place Specialists. Accessible design features appeal to other populations as well because they are intended to make housing easier to navigate by accommodating a range of abilities and forms of mobility. For example, ramps are helpful both to people who use wheelchairs and to families with baby strollers. Home rehabilitation programs can assist with necessary modifications to enable seniors to age at home.

**Adaptable housing.** Seniors are enabled to age at home amidst changing family circumstances when their or others' homes can be adapted for changes such as housing a caregiver, bringing an older family member to live with an adult child, enabling a grandparent to take care of grandchildren, or accommodating an adult child who returns home to live. Zoning that allows adaptable housing can also reduce some need for new affordable housing units.

Two increasingly used forms of adaptable housing options are:

- *Accessory Dwelling Units (ADUs)*, such as elder cottages, granny flats, and family/caregiver suites. In 2008 Arlington County approved ADUs for units inside the home only and also authorized family/caregiver suites.<sup>26</sup>

---

<sup>25</sup> <http://www.nahb.org/generic.aspx?genericContentID=75178&fromGSA=1> accessed 4.7.11.

<sup>26</sup> Family/Caregiver Suites can only be developed by families with children, persons with disabilities, and seniors. They can only be occupied by: 1) relatives; 2) persons providing childcare for families; or 3) persons providing services such as personal care (e.g. assistance with bathing), housekeeping, or yard work for a senior or a person with a disability. Any extra stove must be removed when the family member (e.g. an older child, a grandparent) or the caregiver moves out. Family/Caregiver Suites are cheaper to create than Accessory Dwelling Units.

**The City provides a number of supports to homeowners and renters to make housing more affordable:**

- Real Estate Tax Relief and Assistance Program for Elderly and Disabled Persons
- Rent Relief Program
- Rent or Mortgage Assistance Homeless Intervention Program
- Emergency Shelter Fund
- Subsidized Housing
- Affordable Rental Set-Aside Units

**Affordability also pertains to the cost of home maintenance, modification, and utilities. Again, local assistance is available:**

- Utility, Heating and Cooling Assistance Programs
- Home Rehabilitation Loans
- Weatherization & Home Safety
- Rental Accessibility Modification Program (RAMP)

- *Cohousing*, a type of intentional community composed of individually-owned private homes (houses or condos) supplemented by extensive common facilities. Cohousing can be developed within an existing neighborhood and would not need to be a legal entity unless residents owned common property.

**Healthy housing.** People in the U.S. spend up to 90% of their time indoors. Indoor pollution may be considerably greater than outdoor pollution, contributing to various health problems for people of all ages.<sup>27</sup> Healthy homes are adequately ventilated; adequately lit; adequately heated and cooled; free of excessive exposure to contaminants; free of leaks, pests, and safety hazards; and well maintained. The enforcement of housing codes, integrated pest management, the use of smoke detectors and carbon monoxide alarms, and healthy home audits followed by needed interventions can contribute to improved health for all residents of homes where improvements are made.

Knowledge about the importance of healthy homes by service providers who offer regular in-home services or volunteers who offer visitation can facilitate information-sharing and assistance to help residents create healthier homes.

**Supportive care facilities.** The U.S. Bureau of the Census reports that about 5% of the 65+ population ages in nursing homes,<sup>28</sup> congregate care, assisted living, and board-and-care homes, with about 4% in nursing homes at any given time. The rate of nursing home use increases with age, from less than 2% of the young seniors to almost 25% of the oldest.<sup>29</sup>

The table below lists the types and numbers of senior supportive care facilities currently available in Alexandria:

Senior Supportive Care Facilities		
Type	Number	
	Facilities	Units/Beds
Assisted Living	5	263
Nursing Facilities	6	643
<b>Total</b>	<b>11</b>	<b>906</b>

<sup>27</sup> <http://www.eesi.org/high-performance-building-week-june-13-19-2010-15-jun-2010>, accessed 3.29.11.

<sup>28</sup> A nursing home houses people who require constant nursing care and need significant help with activities of daily living. A congregate care setting offers at least one communal meal per day, along with services and activities. Assisted living facilities provide help with activities of daily living, may coordinate residents' service needs, and monitor their safety and well-being. Board-and-care homes are residential facilities that offer on-site management and supervision of vulnerable or frail adults and provide meals and a range of services.

<sup>29</sup> <http://missourifamilies.org/quick/agingqa/agingqa7.htm>, accessed 3.26.11.

This table indicates that Alexandria needs to increase the availability of nursing home beds for the growing number of aging residents who are likely to need this level of care in later life. The expanded availability of nursing home facilities should be coupled with institutional practices known as Culture Change.<sup>30</sup> These practices advance more person-centered care, empower residents and staff, and improve staff retention in facilities for seniors. The voices of seniors and those working closest with them are honored and respected.

The following table highlights the lack of assisted living facilities for moderate- and middle-income seniors and their insufficiency for low-income seniors. In addition, three facilities in Alexandria dedicated to independent living for low-income seniors 62 and older (Annie B. Rose, Ladrey and Claridge House) currently have frail residents who need the care that an assisted living facility could provide.

A market study in 2004 commissioned and funded by Volunteers of America confirmed the need for affordable supportive accommodations for low-income seniors, as did the City’s Consolidated Housing Plan.<sup>31</sup>

Facility Name	Income Level Served	Type of Facility	
		Assisted Living (Beds)	Nursing Home (Beds)
Birmingham Green, Manassas, VA <sup>1</sup> (Alexandria beds)			
• Willow Oaks	Low	14	
• Nursing Home	Low		19
Fountains at Washington House (CCRC)	Upper	46	55
Goodwin House Alexandria	Upper	42	68
Hermitage	Upper	51	85
Sunrise Assisted Living of Alexandria	Upper	110	
Envoy of Alexandria	Any		111 <sup>2</sup>
Woodbine Rehabilitation & Health Care Center	Any		307 <sup>2</sup>
<b>Overall Total</b>		<b>263</b>	<b>645</b>
<b>Total for Low Income</b>		14	19
<b>Total for Upper Income</b>		249	208
<b>Total for Any Income Level</b>		---	418

<sup>1</sup> Birmingham Green, approximately 40 miles from Alexandria, is sponsored by the counties of Fairfax, Fauquier, Loudoun and Prince William and the City of Alexandria in Northern Virginia. A share of the beds is set aside for Alexandria residents.

<sup>2</sup> These nursing homes serve adults of any age; the nursing beds in senior Continuing Care Retirement Communities such as Goodwin House Alexandria primarily serve seniors.

<sup>30</sup> <http://www.vcu.edu/vcoa/vaculture.htm>, accessed 4.10.11.

<sup>31</sup> Alexandria Commission on Aging report.

Models of mixed-income senior residences for Alexandria's consideration include the award-winning Mountainside Senior Living developed by the Jefferson Area Board for Aging (JABA) in Crozet, Virginia, and Chesterbrook Residences in Fairfax County.<sup>32</sup>

If the combination of extremely high real estate prices and density standards did not apply to affordable housing for seniors, more units per lot would allow less cost per unit. Alexandria zoning and land use policy could offer attractive enticements for private investor(s) to build affordable assisted living. New assisted living projects in Alexandria would be more feasible if changes were made in floor area ratios, parking space requirements, and building height limitations. (See Appendix A for details.) The aforementioned should be achieved by zoning changes rather than the arduous and expensive option of special use permits.

### **The Input from Alexandria Residents**

Housing was the most critical issue of concern to town hall participants, with the largest number of people choosing this breakout group in each town hall meeting. Each time, participants began the discussion by addressing the high cost of housing in the City. Homeowners discussed how rising housing costs, increasing utilities costs, and taxes are pricing seniors out of their homes. Moderate and low income individuals expressed a concern about the limited rental and utility assistance programs and recommended that income eligibility limits be raised.

Seniors expressed challenges to being able to age at home. Many participants were unaware of alternative housing options and services that could help them. For those who wanted to move, the housing options within Alexandria were viewed as limited. Some voiced a need to have their homes retrofitted and ramps installed. Others talked about the lack of creative ideas for senior housing in the city.

Participants suggested that DAAS work with developers and planners to ensure that continuing care communities, assisted living and affordable rentals are built for seniors and persons with disabilities. In addition, alternative living arrangements such as co-housing were recommended. These groups suggested useful ideas such as making sidewalks level, providing transportation to and from senior communities and starting a chore service operated by younger people. Information was needed about room rentals and consumer protection regarding home repairs. Many of the solutions offered would also serve persons with disabilities. The groups proposed that all new construction be environmentally friendly.

In the written input that was received, almost all age groups, and especially those 60+, also saw the need for quality affordable housing as a priority issue. Their concerns included mention of the need for affordable utilities and lower taxes, as well.

---

<sup>32</sup> At Mountainside Senior Living, a combination of fees, local government revenue and private contributions provide subsidy sources for Auxiliary Grant (AG) residents and other persons of lower income to live among persons paying approximately 80% of market rate rents for assisted living. The latter groups' rates are calculated based on cost plus the amount needed to supplement the AG rate that runs close to \$800 below costs each month. Key contributors to success, in addition to this funding framework, are the building's amenities, a well-designed marketing strategy, community acceptance, staffing compensation, culture change features that empower residents and staff, the use of local foods and alignment with JABA. The success of the facility shows that it must be attractive to consumers at all income levels, even though it is "billed" as affordable. The full private pay resident is key to the financial sustainability of the facility. Chesterbrook is a mixed income assisted living facility which opened in 2007. Of the 97 units available, 55% are offered to low income seniors at below market rates. Contributing to its financial feasibility were the gift of five acres of land, financial support from Fairfax County and the Virginia Housing Development Authority, and more than one million dollars in private donations.

## The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2016
<p data-bbox="177 310 427 344"><i>Supportive housing</i></p> <p data-bbox="177 384 1414 459"><b>HOUS 1.</b> Through public/private collaboration, a mixed-income affordable assisted living facility, with at least 100 units, is available to Alexandrians of low and moderate income.</p> <p data-bbox="177 499 354 533"><b>Action Steps:</b></p> <ul data-bbox="177 541 1463 1024" style="list-style-type: none"><li data-bbox="177 541 1414 667">• Consider the changes to local zoning proposed in Appendix A in this Plan for floor area ratio, parking space requirements and building height limitations to make assisted living facilities financially feasible, especially in recognition of the need for facilities to serve lower income levels.</li><li data-bbox="177 678 867 711">• Seek and engage potential private sector partners.</li><li data-bbox="177 722 1463 848">• Advocate for higher State funding for the Auxiliary Grant Program, which provides a supplement to income for qualified residents of assisted living or adult foster care. At \$1,279 a month, it is severely inadequate, since a facility must agree to accept it as full payment.</li><li data-bbox="177 858 1451 934">• Evaluate the City’s financial relationship to Birmingham Green (aka District Home) to determine if it is the most cost-effective model for providing assisted living.</li><li data-bbox="177 945 1414 1024">• Reactivate the Affordable Assisted Living Work Group, with the leadership role located in the Office of Housing.</li></ul> <p data-bbox="177 1066 1463 1142"><b>Who Else Benefits:</b> Family members and other caregivers + Job seekers + Facilities whose resources are overly stretched by the current level of Auxiliary Grant funding</p>	

Objective	FY to be Completed: 2016
<p data-bbox="177 1323 427 1356"><i>Affordable housing</i></p> <p data-bbox="177 1396 1273 1472"><b>HOUS 2.</b> A significantly increased number of new or refurbished units that support independent living are available to older Alexandrians of low and moderate incomes.</p> <p data-bbox="177 1512 354 1545"><b>Action Steps:</b></p> <ul data-bbox="177 1554 1463 1812" style="list-style-type: none"><li data-bbox="177 1554 1187 1587">• Engage developers to create housing for low and moderate income seniors.</li><li data-bbox="177 1598 1435 1724">• Encourage the City to identify what it can do to make Low Income Housing Tax Credit applications for Alexandria development more competitive (e.g., donate land, provide modest rent subsidy for some units, combine senior and workforce housing).</li><li data-bbox="177 1734 1463 1812">• Working with the City Department of Transportation &amp; Environmental Services, increase support for walkable, mixed-use, transit-oriented development for aging Alexandrians.</li></ul> <p data-bbox="177 1871 1166 1904"><b>Who Else Benefits:</b> Family members + Local retailers + Construction industry</p>	

**Objective****FY to be Completed: 2013***Accessible housing*

**HOUS 3.** The City of Alexandria adopts an ordinance allowing accessory dwelling units and family/caregiver suites.

**Action Steps:**

- Review the issue and prepare recommendation for City Council.

**Who Else Benefits:** Builders + Certified Aging in Place Specialists + Local retailers

**Objective****FY to be Completed: 2012***Accessible housing*

**HOUS 4.** Older Alexandrians have easy access to information and understand ways to modify homes to enable aging at home. Information will include universal design, home modification assistance programs, health and safety audits, tax credits and other supports available at the local, state and federal levels.

**Action Steps:**

- Coordinate this objective with Objective INFO 1.
- Publicize the Virginia Livable Home Tax Credit (LHTC) program, which provides tax credits for up to \$5,000 for the purchase of a new accessible residence and up to 50 percent for the cost of retrofitting existing units, not to exceed \$5,000, as of 2/2011.
- Promote universal design and “Visitability” by: (1) informing local builders about the Certified Aging in Place Specialist program of the National Association of Home Builders and (2) providing a brochure or web page that describes what universal design is and details the economic and safety benefits for different populations and stages of life.
- Train and mobilize volunteers (e.g., retirees, boomers, students) to undertake housing audits for seniors and people with disabilities who would like an assessment of accessibility design features, heating and cooling adequacy, features of healthy homes, and maintenance issues. Link this effort to home remodelers who agree to undertake needed upgrades for a “senior-friendly” fee for their products and services. Volunteers can also do repairs to address audit findings.
- Review City regulations about recycling and trash collection to ensure that they accommodate residents’ different physical abilities.
- Ensure that in-home care providers are trained to identify hazards and unhealthy conditions in senior homes and know what resources are available for correction of the conditions.

**Who Else Benefits:** Family members and other caregivers + Builders + Volunteers + Environmentalists + People with disabilities

*Aging at home*

**HOUS 5.** Recognizing the expected growth in eligibility for the Real Estate Tax Relief and Assistance Program for Elderly and Disabled Persons, the City evaluates its eligibility criteria and anticipated fiscal impact and plans accordingly.

**Action Steps:**

- Review the issue and prepare recommendation for City Council.

**Who Else Benefits:** All taxpayers

**Potential Partners For Housing:**

- ARHA – Alexandria Redevelopment and Housing Authority
- Architects
- Financial institutions
- Builders and Contractors
- National Association of Home Builders
- Certified Aging in Place Specialists

### 3. Transportation

**Goal #3. A variety of mobility options, including pedestrian-safe streets, make moving in and around the City and region possible for Alexandrians of all ages and abilities.**

#### Considerations for Alexandria Today

**Transportation options.** The average man will live for six years when he no longer drives, and the average woman will live without driving for ten years.<sup>33</sup> Lack of transportation is linked to missed doctor appointments, the inability to work or attend social activities, and caregiver time needed to provide transport.<sup>34</sup> While a number of transportation programs are available in Alexandria, some seniors are not aware of them. Eligibility requirements and destination limitations may be an impediment to use. Seniors with walkers or canes have difficulty using public transport, and public transport may be

#### Alexandria offers a variety of transportation programs for seniors, including:

- Senior Taxi
- DOT Paratransit Program
- Group Grocery Shopping Trips
- Door Thru Door
- Special Transportation Unit

<sup>33</sup> *Anticipating the Future*, Fairfax 50+ Action Plan, 2007.

<sup>34</sup> <http://seniortransportation.easterseals.com>, accessed 3.25.11.

inconvenient for reaching a preferred senior destination (e.g., YMCA, senior center).<sup>35</sup>

**Pedestrian-friendly community.** Walking is good for one’s health, good for the environment, and good for community vitality. Physical activity can help older people maintain independence and enhance their overall quality of life. Even among frail and older adults, physical activity can improve mobility and functioning. Yet, one-third of U.S. seniors report no daily physical activity.<sup>36</sup> Concern for seniors of the future relates to the fact that in the leading edge of boomers, 40% are obese and 50% have high blood pressure.<sup>37</sup>

Alexandria shares the honor with Arlington and Charlottesville as the “most walkable” places in which to live in Virginia.<sup>38</sup> What this overall measure does not show, however, is how pedestrian-friendly Alexandria is for seniors.<sup>39</sup>

### The Input from Alexandria Residents

The lack of accessible, affordable transportation was very important to attendees at the town halls and was mentioned as a need in every small group, across all topics that were discussed. Lack of transportation created a barrier to accessing service programs specifically and community activities generally. Weekend services were seen as too slow. Riders felt they have to wait a long time for services, which is especially difficult in the winter months. Participants were generally unfamiliar with existing transportation supports. They voiced a desire for discounted or subsidized taxi rides (which Alexandria offers), bus passes, volunteer drivers and bike share programs. They added that public transportation schedules need to be clearer and in larger print.

Different transportation services were suggested, including Saturday services, para-transit (also already offered), water taxis to DC, and companionship services for persons needing assistance to access transportation. Many agreed that they need more information about available resources. They felt that the City website could be updated so residents can find out about transportation programs.

Participants noted that transportation improvements will help all residents of Alexandria, especially disabled persons and single parents who rely on bus services. The more public transportation is available, the less cars are driven, and that in turn would improve the environment.

---

<sup>35</sup> <http://alexandriava.gov/uploadedFiles/humanservices/info/ACHSFinalNeedsAssessmentJuly2008.pdf>, accessed 3.29.11. Also mentioned during town halls.

<sup>36</sup> U.S. Environmental Protection Agency, *Growing Smarter, Living Healthier*, August, 2009.

<sup>37</sup> <http://www.livescience.com/3968-cdc-older-baby-boomers-plagued-high-blood-pressure-obesity.html>, accessed 3.24.11.

<sup>38</sup> <http://www.walkscore.com/VA>, accessed 3.25.11.

<sup>39</sup> One example of design changes that created a senior-friendly community for pedestrians comes from New York, where seniors are overrepresented among pedestrian fatalities. “Elder Districts” were designated that prescribe guidelines for street design in “elder-rich” neighborhoods. Recommended improvements included: changing pedestrian walk signals to reflect a walking speed of 2.5 feet per second; repairing streets and sidewalks to prevent falls; installing pedestrian “refuges” or medians where street widths exceed 90 feet; and installing traffic calming measures. Portland, Oregon, developed Senior Strolls and Senior Bike programs to promote active living for older adults. <http://www.epa.gov/aging/bhc/awards/2008/#portland>, accessed 3.25.11.

Similarly, walking was seen as a challenge in the City because it was observed that the traffic lights do not last long enough for seniors to cross the street. Too often, they said, traffic signals are ignored by drivers. One suggestion was to replace stop signs with traffic lights to prevent drivers from abusing the laws, thereby increasing the walkability of the City. Participants noted that too many bikers are using the sidewalks. If bike lanes and more bike trails were available, this issue would be addressed.

### The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2012
<p><b>TRANS 1.</b> Alexandrians support safe, walkable, mixed-used, transit-oriented development.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"> <li>• Older adults are encouraged to support such design.</li> <li>• Each year, the Alexandria Commission on Aging will invite a representative from the Department of Transportation and Environmental Services to provide an update on progress on goals relevant to the needs of older adults.</li> </ul>	
<p><b>Who Else Benefits:</b> All Alexandrians</p>	

Objective	FY to be Completed: 2013
<p><b>TRANS 2.</b> A cost-benefit analysis of a range of transportation options for seniors is undertaken, and the best strategies are implemented. Options for consideration include:</p> <ul style="list-style-type: none"> <li>• Increase the supply of specialty van transport services.</li> <li>• Expand availability of Senior Taxi (e.g., add evening and weekend hours, add destinations, pilot a coupon discount program).</li> <li>• Determine if the additional DASH buses planned for BRAC-133 rush hour can be put into service during other hours for shared availability across the human services sector.</li> <li>• Investigate the option of using transportation vouchers for older adults to ride the bus or train, take a cab, or even pay friends or a family member for a ride.</li> <li>• Consider the model of the Independent Transportation Network (ITN), which allows older people to trade their own cars for transportation credits and enables volunteer drivers to accumulate credits themselves or convert them into a fund for low income riders.</li> </ul> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"> <li>• Identify appropriate partners to undertake the cost-benefit analysis.</li> <li>• Implement the best identified solutions.</li> </ul>	
<p><b>Who Else Benefits:</b> Family members and other caregivers + Retailers</p>	

**TRANS 3.** Volunteers (e.g., retirees, boomers, students) are utilized to conduct walkability and accessibility audits of Alexandria and local facilities and make recommendations for changes to enhance the experience of seniors and people with disabilities (e.g., increase the safety of sidewalks with pavers, improve navigability in parks).

**Action Steps:**

- Identify and train a volunteer group to take the lead to perform the audits.
- Identify where improvements can be made and share that information with the Chamber of Commerce and appropriate City agencies.
- Issue a “senior-friendly” seal to those businesses and public places scoring well in the audit.

**Who Else Benefits:** All pedestrians + businesses + volunteers + people with disabilities

**Potential Partners For Transportation Options:**

- DASH Bus
- MetroAccess
- Taxi Industry
- Senior Taxi
- WMATA – Washington Metropolitan Area Transit Authority

## 4. Community Services

**Goal #4. Community services accommodate the expectations and needs of aging Alexandrians and support their caregivers.**

### Considerations for Alexandria Today

**Home-based services.** As seniors and their homes age, the right services and products can increase their ability to remain safe at home throughout the later years. These resources include hired assistance, professional care coordination, design modification, and technological advances that can supplement staff and family support. The objectives of a home-based focus are to minimize risk, maintain function and independence, assist family caregivers, prevent institutionalization if possible and provide less costly, quality care.

The home-based service industry offers an array of business development opportunities as a heightened effort is made to reduce facility-based admissions and readmissions, lengths of stay in facilities decrease, and less time is spent in hospitals and nursing homes.

In addition to the “tried and true” set of residential-based services -- nursing care, personal care, housekeeping, and home repair -- new offerings include valet transportation, downsizing assistance, care coordinators, and many more. An emerging model is that of senior “villages,” organizations designed to help seniors age at home. In most cases accessing village services requires paid membership. Through volunteers and paid staff, villages provide information and coordinate access to affordable services such as transportation, social activities, dog walking and simple home maintenance for a fee.<sup>40</sup>

Major challenges exist, nonetheless – a sufficient labor force, better training for all paid and non-paid caregivers, affordability, adequate insurance coverage and payments, and consumer and family awareness, to name the most obvious. The goal is for reliable care at home to be within the reach of all those who want to age at home safely and with dignity.<sup>41</sup>

### Alexandrians have the following resources to support caregivers:

- Alexandria Adult Day Services Center (ADSC)
- ADSC Caregiver Support Program
- Northern Virginia Ombudsman Program
- Department of Community and Human Services
- Division of Aging and Adult Services
- Regional Older Adults Facilities Mental Health Support Team (RAFT)
- Volunteer Guardianship Program
- Meals on Wheels
- Liquid Nutrition
- In-Home Companion
- Senior Services of Alexandria

<sup>40</sup> As of 2011 there was one such village in Alexandria: At Home Alexandria! (AHA!).

<sup>41</sup> In Arlington, an alternative to building an assisted living facility is to offer a broad array of services at a senior independent living facility. A key service is its nursing case management program. The County program provides home visits to adults with multiple chronic conditions who are unable to manage their own care and live in their own homes. Medication management is a critical part of the service. A physician’s referral is required.

**Caregiver supports.** About two-thirds of older people aging at home with chronic disabilities receive only informal care from family or friends.<sup>42</sup> Almost half of the workforce expects to provide care for a senior family member in the coming five years.<sup>43</sup> Providing care can exact a high cost. Family members commonly face health risks, financial burdens, emotional strain, workplace conflicts, and retirement insecurity. The value of respite care cannot be overstated, as oftentimes it prevents caregiver burnout and avoidable institutionalization.

Beyond roles for local government and nonprofits in terms of caregiver supports, employers who offer respite care services to employees minimize the loss of workplace productivity and job termination.<sup>44</sup> With more households relying on dual incomes, job loss can have serious financial implications while also leaving employers without valued employees. AT&T's award-winning Work and Family Program is a pioneer in corporate eldercare.<sup>45</sup> Community members can help support caregivers, as well, as programs such as Legacy Corps<sup>46</sup> demonstrate.

Sometimes seniors themselves are the caregivers, both for other elders and children. A growing number of grandparents care for grandchildren in the absence of the ability of the middle generation to do so. This arrangement is an especially important and cost-effective option for reducing the number of children in foster care and keeping families together, even when the middle generation is absent.

### **The Input from Alexandria Residents**

In the breakout group on Community Services at the town halls, a wide range of issues was discussed, including transportation, civic engagement, and learning opportunities. These particular participant concerns are discussed under those topics. The need for caregiver support was also raised, with one group spending a considerable amount of time on this issue. Persons who do not have a caregiver could use monitoring services such as friendly visitors and telephone reassurance.

In the written input received, residents 60+ put high priority on the need for home care, which relates to their desire for affordable housing. Together, these factors would enable them to remain in their homes longer as they age.

---

<sup>42</sup> National Long Term Care Survey, 1999.

<sup>43</sup> [http://familiesandwork.org/site/research/reports/elder\\_care.pdf](http://familiesandwork.org/site/research/reports/elder_care.pdf), accessed 3.25.11.

<sup>44</sup> Ten percent of women in the US workforce are forced to quit their jobs due to eldercare responsibilities. [http://www.caregiving.org/data/Evercare\\_NAC\\_CaregiverCostStudyFINAL20111907.pdf](http://www.caregiving.org/data/Evercare_NAC_CaregiverCostStudyFINAL20111907.pdf), accessed 3.29.11.

<sup>45</sup> [http://www.indiana.edu/~busx420/HRMWebsite/hrm/articles/benefits/att\\_ben.pdf](http://www.indiana.edu/~busx420/HRMWebsite/hrm/articles/benefits/att_ben.pdf), accessed 3.29.11.

<sup>46</sup> Legacy Corp is a groundbreaking caregiver respite program based on intergenerational support. One California affiliate, for example, trains multigenerational service teams of youth and their older adult mentors to provide free respite care, light household chores, and errands for family members caring for a homebound senior while also providing seniors with companionship and various enjoyable activities. <http://www.nailegacycorps.com>, accessed 3.24.11.

## The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2013
<p><i>In-home services</i></p> <p><b>SERV 1.</b> At least one new affordable in-home service is available for seniors and/or their caregivers.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"><li>• Implement bathing services as part of the Companion Aide program.</li><li>• Research the possible expansion of the Companion Aide program to include in-home respite care, using a sliding fee scale based on caregiver income.</li><li>• Consider creation of a volunteer intergenerational Legacy Corps to provide companionship to frail seniors and respite for their caregivers.</li><li>• Determine the feasibility of providing information and in-home care and support services, such as nursing case management, at locations with high concentrations of senior residents, thereby creating an alternative to assisted living.</li><li>• Determine if selected home-based services could be offered on a sliding scale to all seniors, so that higher fees-for-service could subsidize lower-income seniors.</li></ul>	
<p><b>Who Else Benefits:</b> Families and other caregivers + Discharge planners + Service providers + Job seekers</p>	

Objective	FY to be Completed: 2013
<p><i>Caregiver resources</i></p> <p><b>SERV 2.</b> Caregivers have expanded access to information, education, and resources.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"><li>• Offer periodic conference calls for family caregivers, with part of the call focused on information-sharing about available services and supports, and the remainder for Q&amp;A.</li><li>• Encourage the City of Alexandria Human Resources department to take the lead in modeling workplace policies to accommodate family caregivers—e.g., paid sick leave for caregiving, flex-time, job-sharing, providing employees with information about local resources that assist seniors.</li><li>• Promote affordable technologies that help caregivers deliver, monitor, track and/or coordinate their loved one’s medical care.</li><li>• Create a Caregivers Blog on the Adult Day Services Center website.</li><li>• Establish caregiver information desks at libraries, staffed by older volunteers.</li></ul>	
<p><b>Who Else Benefits:</b> Family members and other caregivers + Businesses</p>	

*Safety and protection*

**SERV 3.** Seniors have at least two new types of advocates looking out for their well-being.

**Action Steps:**

- Coordinate this objective with Objective INFO 1 so that more residents know how to identify need and provide help to seniors when the situation requires it.
- Work closely with Adult Protective Services staff, financial institutions, particularly banks, Social Security offices, senior advocacy groups, and the police to educate employees on how to prevent, identify, and report potential financial exploitation.
- Work closely with EMS personnel, home care providers, neighborhood associations, and others who have routine access to the homes of older residents to enable them to identify hazards, unhealthy conditions, or danger, and respond appropriately.

**Who Else Benefits:** Family members and other caregivers + Financial literacy providers + Insurers

**Potential Partners For Community Service Provision:**

- Property management companies
- Businesses serving older adults
- Health care and other service providers
- Neighborhood associations
- Resident associations

## 5. Economic and Workforce Development

**Goal #5. The important contributions of older Alexandrians to the City's economy are recognized, and the innovative entrepreneurship of older residents is encouraged.**

### Considerations for Alexandria Today

The doubling of the senior population in the years ahead is good news for business because:

- many seniors have considerable spending power;<sup>47</sup>
- the new products and services that seniors need can create new businesses and expand existing ones;<sup>48</sup> and
- seniors have skills and experience that enable them to mentor young entrepreneurs and younger workers.

<sup>47</sup> Nationally, boomers control half of all household discretionary income.

<sup>48</sup> The Richmond-based Boomer Project identifies the following industries as "ones to watch" in terms of their potential to be transformed by boomer purchasing power: travel and tourism, health clubs, home maintenance and home improvement services, grandparent-friendly venues and products, personal care, beauty and apparel, financial services, and education/learning.  
[http://www.boomerproject.com/documents/white\\_papers/50\\_things.pdf](http://www.boomerproject.com/documents/white_papers/50_things.pdf), accessed 3.27.11.

The aging of such a large segment of the population represents a powerful economic engine.

An intentional focus on the senior and boomer market can produce considerable local advantages beyond the obvious. For example, harnessing the support of older residents specifically for *local independent businesses* is good for the City. Unlike national companies with local outlets, spending in local businesses keeps resources within the community.<sup>49</sup>

Making Alexandria senior-friendly to attract seniors from outside the City has economic advantages, too. Older residents comprise a hefty portion of the leisure travel market.<sup>50</sup> They can be incentivized to travel in off-seasons and mid-week when other age groups are less likely to do so. Alexandria's history, beauty, and tourist appeal all position the City well to attract the older market.

Beyond the role of older residents as consumers, they have the ability to drive new entrepreneurial ventures and create jobs – thanks to their strong credit histories and assets, management experience, and higher-than-average education.<sup>51</sup> Experienced professionals with varied business backgrounds can provide essential technical assistance to younger persons as well as older entrepreneurs through nonprofits such as the Service Corps of Retired Executives (SCORE).<sup>52</sup> Older residents can also share employment and life skills with younger workers and those seeking employment, as other communities have demonstrated.<sup>53</sup>

A 2008 report<sup>54</sup> indicated a desire for the City to invest further in training opportunities for job seekers, including expanded training coordinated with the schools. The report said at that time, at T.C. Williams High School, over 1,800 children participated in Free or Reduced Price Lunch, but only 120 students were enrolled in a subsidized work experience program. This gap provides the opportunity to create a defined track, from high school to higher education to a career, that responds to the need for health care and other services and products by the increasing senior population in Alexandria. Attention should be given

---

<sup>49</sup> <http://sustainableconnections.org/thinklocal/why/>, accessed 3.27.11. Independent businesses in communities with Buy Local campaigns reported almost three times the revenue growth in 2010 in comparison to those in communities without such initiatives. <http://www.newrules.org/retail/news/survey-finds-buy-local-message-benefitting-independent-businesses>, accessed 3.27.11. Report of 2011 survey by the Institute for Local Self Reliance.

<sup>50</sup> Data show that 62% of boomers (born between 1946 and 1964) and 55% of seniors (born before 1946) took at least two domestic trips in 2006. [http://assets.aarp.org/rgcenter/general/travel\\_trends\\_1.pdf](http://assets.aarp.org/rgcenter/general/travel_trends_1.pdf), accessed 3.27.11.

<sup>51</sup> <http://www.slate.com/id/2278383?wpisrc=newsletter>, accessed 3.24.11.

<sup>52</sup> <http://www.score.org/index.html>, accessed 3.28.11.

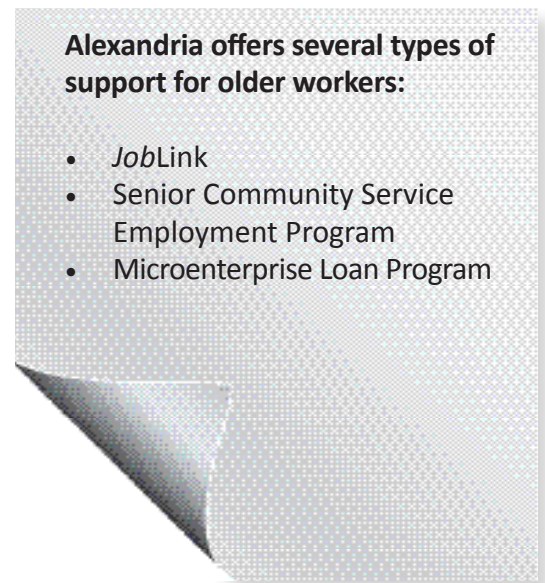

<sup>53</sup> In the Bronx, NY, a successful worker-owned home care agency employs 600 direct-care workers, using targeted recruitment and enhanced entry-level training for promising low-income candidates who seek more secure or meaningful employment. It offers guaranteed employment to those who graduate and has enhanced the status of home health care by positioning it as a career track and valued work. <http://www.directcareclearinghouse.org/download/CHCACaseStudy.pdf>, accessed 3.27.11. In San Diego a non-profit and training organization offers a Senior Mentor Program that matches older adult mentors with people currently enrolled in CalWORKS (California Work Opportunities and Responsibility to Kids). Its goal is to help participants obtain and retain employment. Mentors guide individuals and families toward self-sufficiency through strengthening participants' life and employment skills and connecting them to available community resources and supports. [http://hhsa-pg.sdcounty.ca.gov/CalWORKS/SpecialNotices/SN\\_11-03\\_Senior\\_Mentoring\\_Program.htm](http://hhsa-pg.sdcounty.ca.gov/CalWORKS/SpecialNotices/SN_11-03_Senior_Mentoring_Program.htm), accessed 3.27.11.

<sup>54</sup> <http://alexandriava.gov/uploadedFiles/humanservices/info/ACHSFinalNeedsAssessmentJuly2008.pdf>, accessed 3.29.11.

to English language instruction, since some of tomorrow’s workers are likely to speak English as a second language, and many seniors may only speak English. The increasing diversity of the aging population will make bilingual health care workers very competitive.

Alexandria should consider “rolling out the red carpet” for migrating retirees and make an active effort to retain young government retirees, as well as veterans. They start consulting businesses, launch retail outlets and join the service sector, all adding revenue to city coffers and providing economic opportunities for other generations.

**Workforce opportunities.** By 2019, Americans aged 55+ will make up over 25% of the U.S. labor force. This is good news for the workplace, in that some employers perceive mature workers, compared to younger workers, to be more loyal and reliable with a lower turnover rate, a stronger work ethic, and high levels of skill. A number of innovative programs are being tested to create career pathways, in high demand sectors, for older workers seeking employment transition.<sup>55</sup>

Yet the national unemployment rate for jobseekers 55+ more than doubled between 2007 and 2010, and 43% of older workers had been without a job for over a year. Estimates are that 5% of the employed mature workforce is involuntarily working only part-time and that in 2010 about 20% of older people not in the workforce fell into the “discouraged” category. They had ceased looking for work because they lack the necessary training for available jobs or face barriers by virtue of being older.<sup>56</sup>

Entrepreneurship has increased for people 45+ during the recession. As already mentioned, working to their advantage is the fact that older entrepreneurs, more so than their younger counterparts, are likely to have strong credit histories, assets to tap, management experience, and more education.<sup>57</sup>

As the senior population grows, with more older workers wanting or needing to earn income in the midst of an economic downturn, it may be difficult for the supply of jobs to keep pace with the demand by seniors for work, even the part-time work which many prefer. If national conditions hold locally, Black and Hispanic workers will particularly be affected by stagnant labor force conditions. Certain sectors of anticipated growth which may not be especially attractive to younger workers, including services for the aging, should consider the active recruitment of mature workers.

## The Input from Alexandria Residents

Town hall participants discussed employment, entrepreneurial opportunities, and marketing to seniors. Age discrimination in employment was characterized as a major problem. The group said that seniors lack opportunities to use their expertise as volunteers and employees. They prefer part time job assignments, work at home options and entrepreneurial opportunities. The inability to use technology is a secondary barrier for some seniors. Partnerships with schools and youth were offered as ways to help address this need. Some suggested that DAAS might consider working with the business community to start an “incubator” program for seniors and to stimulate jobs. Also, streamlining the business licensing process would stimulate new commerce.

Participants thought that the business community would benefit by generating products and services for the growing senior market. If they understood the buying and shopping habits of seniors, their profits could increase. For example, seniors prefer to shop between 10AM and 2PM. The Tuesday Sales Days would be more useful if parking was accessible and affordable.

Participants further offered that by encouraging residents to buy in Alexandria, the economy would be stimulated. Additionally, seniors could be encouraged to produce and use green products and services.

### The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2014
<p><b>ECON 1.</b> A high-level task force develops strategies for the private sector and the City to tap the potential of the aging population as employees, entrepreneurs, and consumers.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"><li>• Select task force membership, to include strong leadership from the business and education communities.</li><li>• Utilize local data and innovative examples from other communities to identify how the City can tap the assets of seniors for economic development, including ideas such as: the creation of an “Encore Business Incubator” for older entrepreneurs and their mentoring of younger entrepreneurs to create new local businesses in areas of demand; greater access for older residents to skills such as business-essential computer literacy for re-employment or the maintenance of productivity in current work assignments; workplace flexibility features to retain valued older workers (e.g., part-time work, job sharing, telecommuting); the encouragement of older consumers to “buy local.”</li></ul>	
<p><b>Who Else Benefits:</b> Investors + Local employers + Job seekers + Consumers + Local businesses + Local government (revenue base)</p>	

**Objective****FY to be Completed: 2014**

**ECON 2.** The public high school creates modules for its curriculum, coupled with second language instruction, to attract more of the area's young adults into health care and aging occupations, and links success in those courses to opportunities for internships and education-to-work pipelines.

**Action Steps:**

- With school leadership, create a working coalition of educators, retired medical personnel, and workforce developers to investigate the feasibility and requirements of such a pipeline.
- Begin with a pilot cohort of students to test each phase of the offering.
- As applicable, link students to entrepreneurial opportunities that may emerge from Objective ECON 1.
- Involve SCORE as teachers and consultants to emerging businesses.

**Who Else Benefits:** Youth + Public schools + Volunteers + Local entrepreneurs and employers

**Objective****FY to be Completed: 2014**

**ECON 3.** Alexandria is recognized as a prominent and desirable retirement location, especially for military and federal retirees, as measured by an increase in residents in the City receiving military or federal retirement benefits.

**Action Steps:**

- Utilizing various modalities such as [www.visitalexandriava.com](http://www.visitalexandriava.com), actively promote Alexandria as a desirable retirement location because of its local amenities, walkable neighborhoods, and high quality of life for seniors.
- Monitor the number of military and federal retirees residing in the city to document change.

**Who Else Benefits:** Local businesses and retailers + Housing industry + Local government (revenue base)

**ECON 4.** Employees of Alexandria government, businesses, non-profits and other entities in the City understand the laws prohibiting age discrimination in employment.

**Action Steps:**

- The City’s Office on Human Rights and the Commission on Human Rights, with the Division on Aging and Adult Services and the Commission on Aging, conduct joint outreach to educate older adults about laws prohibiting age discrimination at the workplace and the requirements for bringing cases.
- Both offices and commissions review legislative proposals and support those that can enhance the capacity of older employees to be treated justly if they are subject to age discrimination.

**Who Else Benefits:** Employers who understand the benefits of employing older workers + the City as a model

**Potential Partners For Economic and Workforce Development:**

- Agenda Alexandria
- Council of Governments, COG
- Economic Development Authority
- Northern Virginia Regional Commission, NVRC
- Retirement Associations –  
AARP, MOAA, NARFE, NCOAA
- Chamber of Commerce Small Business  
Development Office
- Older Dominion Partnership
- Public school system
- Community colleges

## 6. Quality of Life

**Goal #6. The quality of life of all Alexandrians is enhanced by the many volunteer activities of its older residents and their continued involvement in the social and civic life of the City.**

### Considerations for Alexandria Today

**Recreational, social, and cultural opportunities and lifelong learning.** Physical and mental health for all ages is advanced through opportunities for recreational, social and cultural activities and lifelong learning. When active aging is intergenerational, it can extract greater benefits from limited public funds and build connections across age groups that otherwise might not have existed – to the benefit of all generations (see Appendix A for examples). Intergenerational Centers are now found around the country within current senior centers, in newly constructed community centers, and housed with adult day care programs.

Boomers expect a different kind of “senior” enrichment experience than their predecessors. Instead of traditional senior centers, they show interest in multipurpose lifestyle centers, coffee houses, and other settings.<sup>58</sup> Service providers in aging will be challenged for a few decades to accommodate both traditional and boomer preferences in their offerings.<sup>59</sup>

Opportunities to continue learning are important to seniors and range from education for its own sake to the development or enhancement of workplace competencies. For older residents who are able to pay, enrichment programming is offered in university settings<sup>60</sup> and “on the road” with travel opportunities.<sup>61</sup> Community input during this strategic planning process revealed that the larger demand among respondents is for enrichment for seniors with more modest means.

#### Alexandria provides opportunities for recreational, social, and cultural opportunities and lifelong learning:

- Senior Centers
- Senior Center Congregate Meals
- Alexandria Department of Recreation and Cultural Activities
- Arts for the Aging
- Libraries
- Adult Education

<sup>58</sup> U.S. Environmental Protection Agency, Growing Smarter, Living Healthier, August, 2009; [http://www.ncoa.org/assets/files/pdf/101110\\_INNOVATIONS\\_FALL\\_2010-FR.pdf](http://www.ncoa.org/assets/files/pdf/101110_INNOVATIONS_FALL_2010-FR.pdf), accessed 3.27.11. Participants expect to be able to come and go all day, engage in exercise and enrichment activities, find technology-friendly space, and have intergenerational options.

<sup>59</sup> Organizations like the National Institute of Senior Centers tracks emerging practices that can help inform local considerations.

<sup>60</sup> The nearest Osher Lifelong Learning Institutes to Alexandria are at George Mason University and American University. <http://www.osherfoundation.org/index.php?olli>, accessed 3.25.11.

<sup>61</sup> E.g., Elderhostel (newly named Road Scholar). <http://www.roadscholar.org/default.asp>, accessed 3.25.11.

For those seniors who want or need to remain in the workforce, opportunities for new skill development may be pivotal in the ability to obtain or retain a job. With technology now the routine method of information-gathering and social networking, more seniors and senior organizations are turning to youth to provide tutorials.<sup>62</sup> This interaction gives youth a better sensitivity to issues of aging, the opportunity to volunteer meaningfully, and the occasion to receive mentoring in return.

**Volunteer opportunities and civic participation.** The value of a volunteer's time was estimated in 2009 to exceed \$20 per hour.<sup>63</sup> This simply reflects a wage-equivalent rather than the real value of the outcomes volunteers can create<sup>64</sup> – children reading at grade level, a safer neighborhood, or a cleaner environment, for example. Today's younger seniors are the generational leaders in terms of community involvement. Older adults tend to give substantial hours through single organizations or causes and over long periods of time.<sup>65</sup> But nonprofits may need assistance to mobilize and retain the expanding resource of engaged seniors.<sup>66</sup> The time and talent of Alexandria's older residents represent a growing natural resource for the community.

**A number of paths are available for Alexandria seniors to volunteer and otherwise be engaged civically:**

- Volunteer Alexandria
- Alexandria Mentoring Partnership (AMP)
- Meals on Wheels
- Alexandria Adult Day Services Center
- Volunteer Guardianship Program
- Long-Term Care Ombudsman Program
- Participation on City Task Forces and Commissions

---

<sup>65</sup> *Virginia's Four-Year Plan for Aging Services*, 2009.

<sup>66</sup> <http://philanthropy.com/free/articles/v17/i17/17004201.htm>; accessed 3.29.11. The best return on investment when using volunteers in leadership roles comes from deploying self-directed teams, providing meaningful levels of responsibility and autonomy, and enabling these volunteers to mentor others. Meaningful work is essential for retention of such volunteers – they seek impact, flexibility, and challenge. [http://www.ncoa.org/assets/files/pdf/100524\\_RespectAbility-Final-Report\\_3.pdf?\\_\\_utma=1.1842397425.1293557769.1293557769.1301250281.2&\\_\\_utmb=1.1.10.1301250281&\\_\\_utmc=1&\\_\\_utmz=1.1301250281.2.2.utmcsr=ncoa.org|utmccn=\(referral\)|utmcmd=referral|utmcct=/strengthening-community-organizations/community-action-volunteering/boomer-solutins-skilled.html&\\_\\_utmv=-&\\_\\_utmk=61667628](http://www.ncoa.org/assets/files/pdf/100524_RespectAbility-Final-Report_3.pdf?__utma=1.1842397425.1293557769.1293557769.1301250281.2&__utmb=1.1.10.1301250281&__utmc=1&__utmz=1.1301250281.2.2.utmcsr=ncoa.org|utmccn=(referral)|utmcmd=referral|utmcct=/strengthening-community-organizations/community-action-volunteering/boomer-solutins-skilled.html&__utmv=-&__utmk=61667628), accessed 3.27.11.

## The Input from Alexandria Residents

At the town halls, participants felt the need for more publicity about recreational and social activities around the City. The perceived lack of communication about services was discussed at length. Specifically, a monthly newsletter was recommended which lists all of the activities by age group. Some felt that quality of life could be improved by being aware of what the city already offers. They recommended a calendar of events (which the City is currently implementing), neighborhood newsletters, a 24-hour voice mail box, and announcements in bulletins of faith organizations. They proposed that community centers such as libraries are a great place to share community information.

Seniors at the town halls underlined that they want their voices to be heard. They stated the desire for senior representation on local commissions and boards and pointed out that adequate transportation facilitates attendance at evening meetings. Starting a Grey Panthers chapter was recommended, and some attendees stated that they should march on City Hall to advocate for themselves.

It appears that participants stay abreast of what is happening in the surrounding counties. It was suggested that Alexandria adopt some practices that neighboring locales offer. For example, they highly recommended improving adult day centers and senior centers using a model from Fairfax County. Some suggested replicating the Arlington County Learning in Retirement Institute.<sup>67</sup> They felt that using existing facilities would minimize expenditures and lead to more interaction among the generations.

With the written input, respondents below the age of 60 tended to equate quality of life with City vitality. They prioritized the importance of the City's physical structure and environmental quality in keeping Alexandria a good place to live. Matters like clean and safe streets, green space, and coordinated housing and transportation development were mentioned. But on the specific question of how seniors might use their talents and skills in the community, all age groups recognized that seniors can play important roles in terms of volunteering, engaging in community projects, and providing leadership. In many instances specific mention was given to the importance of mentoring children and youth and tutoring in the schools. Beyond that, respondents suggested a wide array of engagement – tending community gardens, working with other seniors, and remaining politically engaged, to name a few.

Respondents over 70 saw a particular role for seniors to share their life experiences and wisdom with others. While this set of responses at first seems similar to the issue of mentoring, what stood out about these is that they suggested a more “social-emotional,” even spiritual, role for seniors apart from the instrumental role of the transference of skills such as occurs with tutoring or even mentoring.

It was not unusual for all respondents to mention the value of intergenerational activities, whether in specifics like mentoring or in more general ways like the sharing of facilities and volunteering.

## The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2013
<p><i>Civic engagement</i></p> <p><b>QUAL 1.</b> City Council designates one seat for a resident 60+ on all relevant Boards and Commissions with an identified older constituency.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"><li>• Identify the Boards and Commissions which would benefit from a representative 60+.</li><li>• Meeting by member of Commission on Aging with Chairs of identified Boards and Commissions to discuss benefits of representation for older residents.</li><li>• Submit requests to Council to approve changes in membership requirements.</li><li>• Consider simultaneously recommending the inclusion of youth with an identified constituency on relevant Boards and Commissions, as a gesture of intergenerational cooperation.</li></ul> <p><b>Who Else Benefits:</b> Elected officials + Boards, Commissions</p>	

Objective	FY to be Completed: 2012
<p><i>Volunteer opportunities</i></p> <p><b>QUAL 2.</b> Volunteer opportunities for older adults are readily accessed and the business case for older volunteers is widely known.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"><li>• Work with Volunteer Alexandria to create a category link for older volunteers.</li><li>• Increase the listings for volunteer opportunities within the City on the City web page.</li><li>• Determine the feasibility of posting the City's most important issues that can benefit from volunteerism (e.g., student success, language and literacy skills) on <a href="http://alexandriava.gov/Volunteer">http://alexandriava.gov/Volunteer</a> in order to produce a critical mass of volunteers of all ages – including older residents – to be able to show measurable improvement around the City's key challenges.</li><li>• Develop and distribute printed material to the City, the business community, the nonprofit sector, and neighborhood associations promoting the business case and offering guidance for the use of older volunteers.</li></ul> <p><b>Who Else Benefits:</b> The whole community + Nonprofit organizations</p>	

*Meeting changing expectations of boomer generation*

**QUAL 3.** Boomers' desires are included in designing programs/events/spaces to meet their needs.

**Action Steps:**

- Identify best practices and successful strategies across the nation that meet the desires of boomers and other seniors for recreation, social activities, lifelong learning, and intergenerational programming.
- Determine the feasibility of utilizing existing non-traditional space, such as commercial and retail space and school facilities, for programs and events.
- Research other senior center models such as Café Plus.
- Create lifelong learning classes in a wide variety of subjects for older residents that are taught by older residents. Offer these courses to persons of all ages.

**Who Else Benefits:** City, through greater use of existing spaces

**Potential Partners To Ensure Quality Of Life:**

- |  |                        |

|  | • City                 |

## 7. Health, Wellness, and Safety

**Goal #7. All residents, with special attention to lower-income, older City residents, optimize their wellness and receive the health care they require.**

### Considerations for Alexandria Today

**Healthcare.** Seniors can help the nation move from a disease model of healthcare with exorbitant costs and an institutional focus to an emphasis on prevention, wellness, health and making community-based care a priority. The Medicaid/Medicare system cannot support institutional care for the number of older adults that will be reaching later stages of life over the next 20 years.<sup>68</sup> The Affordable Care Act supports the shift toward wellness and prevention by changing the delivery system from one that responds to acute illness to one that focuses on the management of chronic illness. Other federal efforts that promote public transit and transit-oriented development, as well as tougher standards for toxic emissions, also work to improve individual health by reducing pollution.

Most older persons have at least one chronic condition and many have multiple conditions. Out-of-pocket healthcare expenditures increase with age and have grown over time.<sup>69</sup> The incidence of disability among older adults doubles every five years after the age of 65.<sup>70</sup> One analysis of seniors in Alexandria<sup>71</sup> revealed the following percentages of activity limitations: 39% disabled, but not institutionalized; 18% with mobility limitations, 17% with sensory limitations, 12% with cognitive/mental limitations, and 9% with self care limitations. It also noted the need for geriatric mental health facilities.

Prioritizing wellness and prevention at the individual and community level can produce behavioral and environmental changes that improve residents' quality of life and save considerable healthcare dollars. The Partnership for a Healthier Alexandria is working to engage community members and organizations to promote and preserve a healthy community.<sup>72</sup> Individual behaviors account for 40% of health problems,

---

<sup>68</sup> In Virginia older adults comprise 11% of people receiving Medicaid services, yet drive nearly 25% of Virginia's total Medicaid spending and 50% of Medicaid spending on long-term care services. A national study found that the average total public expenditure for a recipient of home and community-based services through a Medicaid waiver (who must meet the eligibility criteria for institutionalization) was about \$44,000 less per year than for a person receiving institutional services. *Virginia's Four-Year Plan for Aging Services*, 2009:20. The national study referenced in this source is *Institutional and Community-Based Long-Term Care: A Comparative Estimate of Public Costs*.

<sup>69</sup> In 2006-2008, the most frequently occurring conditions among older persons were hypertension, diagnosed arthritis, all types of heart disease, cancer, diabetes, and sinusitis <http://www.cdc.gov/nchs/data/hus/hus09.pdf>, accessed 3.27.11.

<sup>70</sup> (*Anticipating the Future*, Fairfax 50+ Action Plan, 2007)

<sup>71</sup> <http://alexandriava.gov/uploadedFiles/humanservices/info/ACHSFinalNeedsAssessmentJuly2008.pdf>, accessed 3.29.11.

<sup>72</sup> <http://healthieralexandria.org/content.aspx?id=29854>, accessed 4.7.11.

with smoking and obesity (which affects all generations) being the biggest contributors. Among Alexandria residents, 17% smoke, 21% are obese, and 20% admit to engaging in binge drinking. Alexandria also lags behind the state in terms of residents receiving diabetic screenings.<sup>73</sup> Of 132 Virginia jurisdictions, Alexandria was in the top nine in terms of air pollution-ozone days.<sup>74</sup>

In addition to a focus on wellness, Alexandria needs to take advantage of available resources so that residents who are able to live in settings outside of a nursing home have the option of doing so. Funds are now available to provide alternative living arrangements for persons in nursing homes through “Money Follows the Person” (MFP) Demonstration Programs.<sup>75</sup> The Affordable Care Act (ACA) extends the MFP demonstration through 2016.<sup>76</sup> The expectation is that the MFP will enable seniors to have a viable option to receive necessary healthcare in a non-institutionalized setting, thus saving the State dollars and improving health care delivery.

Inova Health System’s decision to initiate a Program of All-Inclusive Care for the Elderly (PACE) in Fairfax should bode well, eventually, for low-income persons over 55 in Alexandria. It is not unreasonable to expect a successful PACE in a neighboring locality to lead to PACE expansion elsewhere in Northern Virginia for a very vulnerable sub-population-- persons meeting nursing home criteria and eligible for both Medicare and Medicaid. In addition to serving this high risk group of older persons, a PACE can positively influence geriatric care of other seniors, as hospitals and community based service organizations learn strategies of multi-disciplinary collaboration and evaluation that can benefit non-PACE members.

**Good nutrition.** Access to healthy foods improves both the quality of life and the longevity of older people<sup>77</sup> and prevents obesity for all generations. Local organizations, community leaders and residents can advance a local foods initiative that benefits people across socioeconomic status and reduces the environmental footprint created by the distance between farm and table. Programs that offer meals, such as schools and aging services, have an institutional power that can fuel such an effort. Appendix A offers ideas for consideration as components of a local foods system.

---

<sup>73</sup> <http://www.countyhealthrankings.org/virginia/alexandria>, accessed 3.28.11.

<sup>74</sup> <http://www.countyhealthrankings.org/virginia/alexandria/29>, accessed 3.28.11.

<sup>75</sup> While this program is limited to Medicaid enrollees, the development of transition care services should benefit other residents of nursing homes as additional community and home-based services are developed to respond to MFP client needs. Currently, 29 states, including Virginia and the District of Columbia, have implemented MFP.

<sup>76</sup> Under the ACA, individuals who reside in an institution for more than 90 consecutive days are now eligible to participate in the demonstration, unless those days were for the sole purpose of receiving short-term rehabilitation therapy (because those days are covered by Medicare and excluded from the MFP).

<sup>77</sup> <http://www.sciencedaily.com/releases/2010/12/101222071727.htm>, accessed 3.27.11.

**Safety and protection.** Feeling safe and secure in one's home and community is important to the well-being of all Alexandrians – and especially to those residents who have special needs or vulnerabilities. A conservative estimate is that 14% of non-institutionalized older adults had experienced physical, psychological, or sexual abuse; neglect; or financial exploitation in the past year, according to a 2009 study.<sup>78</sup> Abuse and neglect of seniors is typically perpetrated by family members.<sup>79</sup> Alexandria has seen an increase in hoarding cases, which are generally indicative of self-neglect, and of financial exploitation.

Beyond the home, seniors can be targeted in fraudulent schemes.<sup>80</sup> But seniors' well-being can also be subject to problems with government rules and regulations, as a recent lawsuit by the AARP against the U.S. Department of Housing and Urban Development around reverse mortgages illustrates.<sup>81</sup>

In the face of a local disaster, particular consideration needs to be given to the older population.<sup>82</sup> Seniors themselves, local officials, and emergency volunteers all need to anticipate the special dimensions of emergency preparedness for the older population.

#### **Senior residents have access to protection through:**

- Adult Protective Services
- Link to Life
- CareRing
- Long Term Care
- Ombudsman Program
- Project Lifesaver
- Legal Services of Northern Virginia
- Office of Emergency Management
- Police Department
- Office of Sheriff

### **The Input from Alexandria Residents**

At the town halls, opportunities to exercise and socialize were seen as important contributors to wellness. Many participants indicated there are too few health and wellness programs in the City and that lack of transportation is a barrier to participating in existing activities. A lack of opportunities for intergenerational

<sup>78</sup> <http://www.gao.gov/products/GAO-11-208>, accessed 3.28.11. Physical and cognitive impairments, mental problems, and low social support among victims have been associated with an increased likelihood of elder abuse, which is in turn associated with negative effects on victims' health and longevity.

<sup>79</sup> [http://www.ncea.aoa.gov/ncearoot/Main\\_Site/pdf/publication/FINAL%206-06-05%203-18-0512-10-04qa.pdf](http://www.ncea.aoa.gov/ncearoot/Main_Site/pdf/publication/FINAL%206-06-05%203-18-0512-10-04qa.pdf), accessed 3.28.11. While no single profile can be identified for a perpetrator, the following factors may be implicated: alcohol or drug dependence, a history of domestic violence, mental illness or dependency, personal stressors, economic pressures, and longstanding personality traits like a bad temper or a tendency to blame others for problems.

<sup>80</sup> <http://www.cops.usdoj.gov/files/RIC/Publications/e07042443.pdf>, accessed 3.28.11. These tend to employ salespeople who seek to gain the older person's trust and confidence, use business names that are similar to well-known organizations, and/or insist on quick decisions. The focus for such fraudulent activity centers around prizes and sweepstakes, investments, charitable contributions, home and car repair, insurance, health remedies, travel, and confidence games.

<sup>81</sup> <http://www.nytimes.com/2011/03/12/your-money/12money.html>, accessed 3.28.11.

<sup>82</sup> Seniors' ability to shelter in place may be compromised if they require in-home care. Their ability to leave an area rapidly may be constrained by lack of any transportation, or lack of transportation that accommodates their physical circumstances. And their ability to live apart from their home if evacuation is required may be dependent on their uninterrupted receipt of benefits checks, access to pharmaceuticals, and access to new health providers who need their medical records.

activities was also noted. To increase recreational options, participants suggested utilizing existing community resources such as T.C. Williams for gardening, exercise and culinary classes and churches and recreation centers for other social activities.

Traditional medical issues were also discussed. It was suggested that the City open more medical clinics because persons who are under-insured or lack insurance cannot afford hospital care. Others wanted a list of providers who accept Medicare and Medicaid. Likewise, they wanted information to locate geriatricians and recommended that the city provide tax breaks and incentives to attract doctors. Participants also were interested in receiving information to help them find prescription drug programs. They felt that this type of information as well as 211 services could be promoted through pharmacies and non-profit organizations.

In thinking about other generations that could benefit from their suggested objectives, attendees expressed strong interest in exercise and activities for all ages. Consequently, they believed, the city would have a reduction of automobile emissions as more residents ride bikes and walk. They also wanted intergenerational learning such as seniors teaching kids reading and teens teaching seniors to use computers. It was suggested that DAAS consider a survey to learn more about the health of seniors in the city.

### The Alexandria of Our Future: Objectives and Action Steps

Objective	FY to be Completed: 2014
<p><i>PACE</i></p> <p><b>HEAL 1.</b> PACE, the Program for All Inclusive Care for the Elderly, expands into Alexandria.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"> <li>• Collaborate with INOVA Hospital system to integrate Alexandria residents into their PACE program, by opening an Alexandria PACE site.</li> <li>• Educate Alexandrians about benefits of PACE program.</li> </ul>	
<p><b>Who Else Benefits:</b> Family members + Caregivers + Businesses serving seniors</p>	

Objective	FY to be Completed: 2012
<p><i>Community Based Services</i></p> <p><b>HEAL 2.</b> Funding from the Affordable Care Act is secured for community and home based services.</p> <p><b>Action Steps:</b></p> <ul style="list-style-type: none"> <li>• Needs of Alexandrians for home and community based care are identified.</li> <li>• A lead organization takes responsibility for developing a proposal and managing the federal process for grants.</li> </ul>	
<p><b>Who Else Benefits:</b> Family members + Caregivers + Businesses serving seniors and their families</p>	

**Objective****FY to be Completed: 2013***Mental Health*

**HEAL 3.** Appropriate urgent/emergency services are available within 25 miles of Alexandria to seriously mentally ill adults, including acute hospitalization and crisis care alternatives.

**Action Steps:**

- Collaborate with other local jurisdictions to develop cross-jurisdictional solutions.
- Work with NVAN if legislative change is needed.

**Who Else Benefits:** Family members and other caregivers

**Objective****FY to be Completed: 2015***Good Nutrition*

**HEAL 4.** Older adults and other residents have access to healthy, fresh foods and understand the role of nutritious foods in preserving health.

**Action Steps:**

- The Alexandria/Arlington Cooperative Extension Service works with the Department of Recreation and Culture Activities and the Division on Aging and Adult Services to identify locations for additional community gardens serving lower-income, older adults.
- Older adults, who are able, work in the community gardens.
- Alexandria's farmers' markets accept SNAP (food stamps).
- Nutrition information and guidelines relevant to older adults are widely available and classes are provided by the Alexandria/Arlington Cooperative Extension Service.
- An assessment is undertaken to determine the feasibility of greater use of local fresh foods in senior meals programs.

**Who Else Benefits:** All Alexandrians + Environmentalists

*Emergency Preparedness*

**HEAL 5.** Special needs populations within the City of Alexandria, particularly the subset of Alexandria residents with special medical needs, are defined and identified so that appropriate support is available to them in the event of an emergency.

**Action Steps:**

- Assist the Alexandria Health Department to identify known clients who have special medical needs.
- Advise clients with special medical needs to develop a personal preparedness plan to promote self-sufficiency for at least 72 hours following an incident.
- Serve on the task force, working with the Alexandria Health Department, to increase coordination among partner agencies to meet the needs of residents who may require special medical care/support during an incident.
- Assist the Health Department to identify resources to help City departments and other agencies meet the needs of all Alexandria residents during an incident.

**Who Else Benefits:** Persons with disabilities + Caregivers + Emergency response personnel

**Potential Partners to Advance Health And Wellness:**

| • Alzheimer's Association                            | • Red Cross                          |
| • Alexandria Emergency Medical Service               | • Partnership for Healthy Alexandria |
|  | • Alexandria Health Department       |

## Chapter 5. Plan Implementation and Management

### Managing the Work

The Objectives have been arrayed over a proposed five-year implementation sequence (below) so that residents see yearly progress on the issues while appropriate time is given for the most complex objectives to be implemented. For Objectives in the out-years, work will nevertheless need to be initiated in 2012 or 2013.

YEAR OF COMPLETION	2012	2013	2014	2015	2016
<b>OBJECTIVES</b>	<b>INFO 1</b>	<b>HOUS 3</b>	<b>ECON 1</b>	<b>ECON 2</b>	<b>ECON 3</b>
	<b>HOUS 4</b>	<b>HOUS 5</b>	<b>QUAL 3</b>		<b>HOUS 1</b>
	<b>TRANS 1</b>	<b>SERV 1</b>	<b>HEAL 1</b>		<b>HOUS2</b>
	<b>TRANS 3</b>	<b>SERV 2</b>	<b>HEAL 4</b>		
	<b>SERV 3</b>	<b>QUAL 1</b>			
	<b>QUAL 2</b>	<b>HEAL 3</b>			
	<b>HEAL 2</b>	<b>TRANS 2</b>			
	<b>HEAL 5</b>				
	<b>ECON 4</b>				

This Strategic Plan has built interest and momentum around the aging of Alexandria. New allies and newly-identified stakeholders have been brought to the table throughout the Plan’s development. In order for DAAS to maintain these relationships and to realize the aspirations Alexandria has for its older residents, the following infrastructure is needed:

- 1. Sufficient staff support within DAAS** to implement the Strategic Plan and assure its meaningful coordination with other strategic plans of the City. The Division of Aging and Adult Services is currently structured to serve the core work of Area Agencies on Aging – planning and advocacy for seniors; providing what are now the traditional aging services and activities, with special emphasis on seniors who are low income and most at risk of being institutionalized; and providing staff support for the Alexandria Commission on Aging. In the decade ahead, DAAS will need to continue to serve these functions well, even as these functions must be adapted to a new type of senior and a growing clientele.

At the same time, DAAS must be positioned to seize tomorrow's opportunities, as described in this document. This entails continued engagement with current allies, mobilizing new allies, and helping others in Alexandria appreciate how deeply the well-being of current and future seniors is tied to the overall well-being of Alexandria today and in the future. Their work will transcend human services per se and extend into matters like the built environment and economic development. Their contribution to a livable community for all ages requires that commitment.

- 2. Determination of the feasibility of creating a nonprofit, 501(c)(3) corporation** that will have the flexibility to avail itself of the many entrepreneurial possibilities spawned by a growing senior marketplace. Such business opportunities would have a triple bottom line – meeting DAAS's mission, serving a wider spectrum of older Alexandrians, and producing positive financial returns. DAAS could then choose to pursue revenue generating ventures, either on its own or in partnership with local businesses, both with existing companies as well as start-ups. It is projected that consumers will show a preference for DAAS services, knowing their purchase will simultaneously be contributing to a charitable enterprise. Within this new organization and affiliated entities it may create, DAAS can provide consulting expertise, a variety of health related services and also enter into agreements to build affordable housing. Diversifying the DAAS revenue base will supplement government funds and contribute to the financial sustainability of existing programs.
  
- 3. Intentionality to the increasing diversity of the older population.** The expected growth in the number of older Alexandrians is coupled with the fact that this larger cohort will be more diverse in terms of language, race, and ethnicity than previous groups of seniors. Nationally, "ethno-gerontology" – the understanding of variations in the aging experience across different racial-ethnic groups – is a growing competency. Alexandria prides itself on its cultural diversity, but language barriers experienced by immigrant populations can challenge human service workers' ability to effectively serve these clients. Seniors from 40 different countries visit Alexandria senior centers, and many patrons of these centers indicate they would appreciate paperwork assistance in their native language. A national study found that Latino older adults are less likely to access services from mainstream service providers because these are not likely to be culturally sensitive, do not have Spanish-speaking employees or materials, and senior Latinos do not know about them or have transportation to them. That conclusion is unlikely to vary significantly across other immigrant groups where English is a second language.

Culturally aligned services are more effective services. Strong connections between majority-group senior-serving organizations and community-based organizations that are aligned to specific cultural communities can strengthen all organizations. Consistent information-sharing between DAAS and the City's initiative on multicultural services is another bridge that can advance culturally aligned services for Alexandria's increasingly diverse older residents. A strengthened understanding about and responsiveness to seniors (and other generations) across cultural groups can be achieved

through systematic use of a cultural alignment or equity assessment tool<sup>83</sup> in governmental decision-making. The availability of informational materials in key local languages and services that are culturally sensitive are key components of intentionality in reaching and responding to diverse older residents and their families.

4. **Extension of the DAAS Strategic Plan Advisory Group.** This group represents linkage to sectors of the City outside of the aging network, with whom relationships will need to deepen to fully realize the Goals and Objectives of this Strategic Plan. The Advisory Group participation can be expanded to include Commission on Aging members and Aging Liaison members for ongoing cross-sector information-exchange and bridge-building.
5. **A trained cadre of spokespeople** who are knowledgeable about aging issues and can constitute a Speakers Bureau to inform and mobilize residents around the implementation of this Plan. The Commission on Aging can serve as the core group for this function and can tap, among others, participants from among the Advisory Group and the Aging Liaisons.
6. **Annual progress reports from City departments and other stakeholders** who have taken the lead in the implementation of various aspects of the Plan. Each year, the Alexandria Commission on Aging, in conjunction with DAAS, should invite these entities to make a formal report to the Commission on what has been accomplished and their plans for implementation and other forms of action in the year ahead. Such planned annual convenings foster both the knowledge sharing and accountability that are crucial to collaborative movement toward a livable community for all ages.
7. **Collaboration** where the aspirations of this Plan intersect with other City strategic plans. Appendix G summarizes the ways that Objectives in this Plan align with those in other City strategic plans. Collaboration around the implementation of shared aspirations will produce efficiencies for all stakeholders and demonstrate the interdependence of Alexandrians in the creation of a livable community for all ages.

### Results Tracking

The template on the next page is provided to assist with the implementation of The Objectives and Action Steps. Each step of the implementation of an Objective would be identified and tracked on this form. When compiled, these forms facilitate the preparation of an annual report on the status of the Objectives and Action Steps. It is strongly encouraged that this process be automated through an electronic team site that enables information sharing and convenient member communications.

---

<sup>83</sup> One such user-friendly tool, which has been tested in over 20 states is the 5-question Racial Equity Impact Analysis, <http://www.aecf.org/~media/PublicationFiles/MORE%20Newsletter%20Toolkit%20Starter%20Version5228PK%20for%20adobe.pdf>, accessed 5.22.11.

This template is fairly standard, with two exceptions:

1. It tracks the multiplier effects of change. That is, it asks implementers to keep track of the positive outcomes beyond the expressed purpose of the action. This component of the tracking process does two things. First, it encourages users to think more intentionally and systematically about how to solve more than one issue with a single strategy. Second, it provides additional information to enable advocates to make robust cases to decision makers, as the latter increasingly have to choose among competing investments in tough fiscal times.
2. It tracks changes to policies and regulations. This information shows the extent to which change becomes “hard-wired.” Hard-wiring is an important measure of sustainability.

Information from each of the Action Steps for any given Objective can be aggregated into a full report of the progress and challenges in relation to each Objective. In turn, reports from each Objective that is required to reach a designated Goal can be aggregated to identify the progress and challenges toward achieving the Goal. Finally, the progress and challenges regarding each Goal can be aggregated into an overall annual Status Report on the Strategic Plan on Aging.

Alternatively, DAAS may wish to consider other templates in use in the City for implementation tracking and reporting.<sup>84</sup> These can be expanded to note the multiplier effects that are core to the strategies in this Plan.

<b>Alexandria Strategic Plan on Aging</b>					
<b>RESULTS TRACKING FORM</b>					
<b>Objective #:</b> _____					
<b>Lead:</b> _____					
<b>Action Step:</b> _____					
Task	Responsible Party + Allies	Due Date	Date Complete	Indicators of Multiplier Effects	Changes to Policy/Regulations
(Repeat the above as necessary to capture all of the Action Steps for a specific Objective...)					
<b><i>Provide instructions for where, to whom, and how regularly the Tracking Form should be submitted.</i></b>					

<sup>84</sup> E.g., <http://alexandriava.gov/uploadedFiles/planning/info/Arlandria/Arlandria%20Implementation%20Schedule%20-%20March%202010.pdf>.

## Chapter 6. Beyond Year 5

The creation of a livable community for all ages is a long-term vision whose elements will change as further innovations and funding resources become available, as the international, national, and state contexts continue to shape localities, and as the City's political will and ability to mobilize stakeholders drive the pace of implementation. What is certain about the Objectives and Action Steps in this Strategic Plan on Aging is that, if implemented, they are sustainable. They are sustainable because they:

- have taken the future into account when plotting today's course;
- identify strategies that solve multiple issues simultaneously;
- take seriously the stewardship of all resources – human, environmental, fiscal; and
- seek common ground across constituencies through identifying the aspirations that different groups share.

This is a five-year Plan with a twenty-year horizon, grounded in the realization that some of the Objectives and Action Steps require ongoing work and others will only be realized fully beyond a five-year window. The sustainability of the approach taken by this Plan resides not only in what it can materially accomplish but also in its promotion of collaborative, bridge-building work.

At the five-year juncture, the following steps are recommended:

1. The City should undertake a comprehensive review of the results of the 5-Year Strategic Plan on Aging. Accomplishments should be posted, and the lessons learned should be incorporated into the next phase of action. A presentation should be made to City Council, and the Plan should be updated.
2. The approach this Plan encourages should be assessed. Are departments and groups working together more than before? Has this enabled more efficient and effective utilization of government revenue? Are City facilities being used more and shared more than in the past? If so, have these changes become “hard-wired” through streamlined organization, expectations for resource-sharing, cross-training, or other actions that help to sustain such change?
3. Actions that have been implemented at institutional or neighborhood levels should be reviewed in terms of their ability to influence cross-institutional and community-wide undertakings.

The results of these steps will set the course for the following five years – and beyond.

## Chapter 7. A Call for Champions of All Ages

Creating a livable community for all ages requires champions of all ages from across all sectors of community life. The Objectives and Action Steps in this Strategic Plan on Aging seek to activate a wide range of agencies, organizations and residents to contribute their expertise, time, and energy to concrete change for the Alexandria of our future. That change stands to benefit everyone.

Aging is a lifelong process. What a community does for every generation today predicts not only how today's seniors fare, but also the prospects for tomorrow's seniors. At any age every resident has assets to share and concerns to be addressed. This Plan highlights the significant assets that Alexandria's older residents bring to shape a vibrant City. It also positions Alexandria as a caring community for those in later life who have the need for assistance and support.

The expected doubling of Alexandria's older population is dramatic in itself. Even more dramatic is the opportunity for the City to respond by committing to strategies that strengthen bonds across generations, recognize the interconnectedness of issues, and build bridges across departmental domains and constituencies. This Plan offers those strategies. And it foresees a host of champions and allies for the work ahead.

### Expanded Information on Selected Aging Issues

#### Zoning Changes That Make Assisted Living Affordable

Changes that could lead to new assisted living projects in Alexandria include the following:

1. Floor Area Ratio (or FAR) – Designate a uniform FAR for qualifying assisted living construction projects in all areas in which multifamily construction is allowed. For example, in Alexandria’s RA/Multifamily Zoning designation, the maximum FAR is .75, meaning that the total floor space of an assisted living building may not exceed 75% of the square footage of the land on which it is built. With the smaller load on municipal resources generated by assisted living facilities and lower number of residents requiring parking spaces in comparison to typical multifamily apartments, a larger FAR is easily justifiable for assisted living uses wherever they may be located. In areas to which Alexandria’s RCX Zoning designation applies (which includes apartments), a FAR of 1.25 is allowed.

For instance, on a one acre (43,560 sf) lot in RA zoning, an assisted living facility with 32,738 sf of floor space can be built, but 54,563 sf could be built in an RCX area – almost 67% larger. Because insufficient density is allowed in RA areas to make assisted living economically feasible, land in that zoning category is effectively excluded from assisted living development. So people who have aged in place in RA neighborhoods must move to RCX areas for long term care.

Unlike typical apartment complexes, assisted living developments have very significant operating costs and require higher density to achieve economies of scale that allow those operating costs to be recovered. So, lower density rules favor the former and preclude the latter.

2. Parking Space Requirements – Very few residents of assisted living facilities have cars. This should be reflected in the FAR and other applicable ordinances for assisted living and nursing homes. A different calculation should be used for independent living apartments based upon empirical research. In Albemarle County, lower parking space requirements per apartment in an independent senior housing apartment complex are achieved by the owner/operator agreeing to provide services that enable persons to age in place. In the case of assisted living, planning and zoning staff should determine, based on the number of beds proposed to be built, how many parking spaces are needed for visitors, vendors (including physicians) and staff, taking into account the use of mass transit, especially by staff. The likelihood that a person ready for assisted living care will be driving a car is low. Requiring underground parking as a means of increasing density adds significantly to non-revenue generating building costs, which will be reflected in higher rents or make the building infeasible.

3. Building Height Limitations – Assuming appropriate aesthetic setbacks, multifamily height restrictions should be modified for assisted living solely in order to lower per unit costs by increasing density. In RA/Multifamily Zoning, the maximum building height is 45 feet. In RCX it is 50 feet. Both limitations effectively limit quality construction to 3 floors.
4. The aforementioned should be achieved by rule changes rather than the arduous and expensive option of special use permits.

### **Ideas to Advance a Local Food System**

Today's food system has contributed to the increased incidence of obesity and diet-related diseases. With recent produce recalls and warnings due to the outbreak of e coli and other contaminants, consumers of all ages are increasingly demanding to know about the origins and safety of their food sources. Consumers are also increasingly alarmed about large agribusiness' heavy-handed use of chemical fertilizers and insecticides for maximum crop yield.

Local food systems build a stronger, sustainable and more self-reliant community. Ideas to advance a local food system and produce benefits such as economic vitality, improved public health, ecological sustainability, social equity and cultural diversity include:

- Support for a comprehensive public/private food planning process that strengthens production, distribution and consumption of local and regional food products.
- Support for food system mechanisms that preserve diverse traditional food cultures of ethnic minority communities.
- Support for federal and state legislation that facilitates community and regional food system production.
- Establishment of local food usage goals for all nutrition/feeding programs receiving City funds, including schools, parks and recreation programs and senior meal programs.
- Creation of opportunities for SNAP (food stamps) to be used at farmers markets within the City.
- Identification of "food insecure" areas in the City that can benefit from improved access to supermarkets that regularly offer fresh produce.
- Conversion of vacant land, owned by the City, into vegetable gardens for tending by persons with varied health, social and economic capacities.<sup>87</sup>

---

<sup>87</sup> Many of these objectives are from the publication by the Jefferson Area Board for Aging in Charlottesville, VA, *Meal Programs: Feeding a Crowd with Local Foods*, written in cooperation with JustPartners, Inc.

## Examples of Value-Added Intergenerational Activities

When active aging is intergenerational, it can extract greater benefits from limited public funds and build connections across age groups that otherwise might not have existed – to the benefit of all generations.

For example:

- A student learning English can be paired with an older English-speaking adult for language practice and cultural exchange. Or, seniors with first languages other than English could offer language instruction for college students so that the next generation will have stronger language skills for the multicultural and global workplace.
- In Philadelphia an intergenerational ensemble of actors helps audiences grapple with tough community issues through improvisation and interactive techniques.
- Facilities that house activities across generations produce substantial benefits for both children and older adults. For example, preschool children involved in intergenerational programs have higher personal/social development scores than their peers not involved in such programs. Older adults who regularly volunteer with children are more optimistic, healthier, and perform better than peers on memory tests. Additionally, intergenerational sites that share expenses experience significant cost savings in the areas of personnel and rent-- by far the largest budget items for these programs.<sup>88</sup> An example in Fairfax is Gum Springs Glen, an apartment complex which provides affordable living to seniors with moderate incomes. It includes a Head Start program on the ground floor, providing opportunities for volunteer service and intergenerational interaction.

## Appendix B.

### List of City Council Members

Mayor William D. Euille  
Vice Mayor Kerry Donley  
Councilman Frank H. Fannon IV  
Councilwoman Alicia Hughes  
Councilman Rob Krupicka  
Councilwoman Redella S. “Del” Pepper  
Councilman Paul C. Smedberg

## Appendix C.

### List of Strategic Plan Advisory Group Members

Councilwoman Redella S. “Del” Pepper	Stephanie Landrum
Chuck Benagh	Erin Teal Littlestar
Katy Cannady	Tim Lovain
Tony Castrilli	Laura Macone
Rachael Chieza	Amber Nightingale
Mark Feldheim	George Pera
Carter Flemming	John Porter
Tim Gleeson	Carrie Fesperman Redden
Vanessa Greene	Joan Renner
Bill Harris	Bill Skrabak
Hector Hernandez	Robbie Werth

## Appendix D.

### List of Aging Liaisons from City Departments

Courtney Ballantine, Police	Helen McIlvaine, Housing
Steve Chozick, P&Z	Cassandra Menefee, Finance
Tim Gleeson, Sheriff	Margaret Orlando, Recreation
Fannie Goll, ITS	Jean Gregorio, Library
Robert Rodriguez, Fire and EMS	Hai-Fen Huang, General Services
Gloria Sitton, City Clerk	Ryan Touhill, OMB
John Hyder, DCHS	Sue Story, HR
Mary-Ann Johnson, DCHS	Steve Kaii-Ziegler, P&Z
Alex Malooley, Health Department	Rhonda Williams, DCHS

## Appendix E.

### List of Alexandria Commission on Aging Members

Jane King, Chair	
Ben Kellom, Vice Chair	
Carol Downs, Secretary	
Councilwoman Redella S. "Del" Pepper	
Janet Barnett	Eileen Longstreet
Robert Breiner	Jan Macidull
Irene Carpenter	Laura Macone
Joan Dodaro	Pat McBride
Cedar Dvorin	Nicole Lifrig Molife
Bob Eiffert	Mary Parker
Louis Ferrand	Lewis Simon
Don Fowler	Patricia Sullivan-Perry
Bill Harris	

## Appendix F.

### List of City Staff from the Department of Community and Human Services

Michael Gilmore, Ph.D., Director

Suzanne Chis, Executive Deputy Director

Carol Layer, Deputy Director

MaryAnn Griffin, Director, Division of Aging and Adult Services

Debbie Ludington, Long Term Care Coordinator, Division of Aging and Adult Services

Diana Reynoso, Administrative Support IV, Division of Aging and Adult Services

## Appendix G.

### Alignment of this Plan with Other City Strategic Plans

0 1,000 2,000 Feet

**ADDENDUM 2**

**This chart replaces the chart on p. 19 of the Draft Plan**

### Addendum 3

This addendum explains the “PACE” program, which is referenced in the draft Aging Strategic Plan on page 54.

#### 1. Description of PACE:

##### a. What is PACE?

PACE is an acronym for Program of All-inclusive Care for the Elderly. An interdisciplinary team provides comprehensive community-based care to adults 55 years of age and older who meet the criteria for both Medicaid and Medicare.

##### b. What services are provided?

PACE covers all services needed by participants to include primary health care, hospitalizations, medications, home care, transportation, physical therapy, occupational therapy and nursing home care when needed. The only expense not included is housing. Most services are provided in an adult day health care setting, which is the core of the program to promote wellness.

##### c. What are the benefits of PACE?

The main benefit of PACE is to provide the opportunity for older adults to remain in the community and out of institutional settings. The program saves money for the Medicare/Medicaid system and participants express a high level of satisfaction.

##### d. How is PACE funded?

PACE providers receive a capitated amount from Medicare and Medicaid for each participant to cover the cost of all care provided.

##### e. Who approves application for PACE program?

The Virginia Department of Medical Assistance Services (DMAS) approves providers for the right to operate PACE in a specific geographic area within the state, and the federal Centers for Medicare and Medicaid Services (CMS) finally approves and funds providers to operate PACE.

#### 2. History of PACE:

##### a. National:

PACE began in the early 1980s as a pilot program in the Chinese community of San Francisco as a culturally appropriate alternative to nursing home care. In 1990, Medicare and Medicaid waivers were established to fund PACE programs elsewhere. By 2010, there were 75 PACE programs operating in 29 states.

##### b. Virginia:

Virginia began its first PACE program in 1996 in the Tidewater area. Currently there are 6 PACE programs operational in Virginia, with Northern Virginia (NoVa) as the next designated area for a PACE program.

##### c. Northern Virginia (NoVa):

The Fairfax County Health Department led the exploration of PACE in NoVa and in 1996 supported a County-funded feasibility study that showed an insufficient number of eligible participants to make PACE successful. In 2005, the Fairfax County Health Department again initiated an exploration of PACE and brought together various stakeholders to gauge interest. In 2008, the County completed a second feasibility study that showed a sufficient number of eligible persons to make PACE successful. In 2009 Inova Health System commissioned its own feasibility study that also showed a sufficient number of eligible persons to make PACE successful. In 2010, Inova applied to DMAS and was approved to submit a PACE provider application to CMS. Inova has leased the Braddock Glen Adult Day Health Care Center (ADHC) from Fairfax County, where, upon final state and CMS approval, they will operate PACE and continue the ADHC for as long as current ADHC participants remain eligible for those services. Inova's goal is to take over operation of the ADHC and have its PACE program ready to open in early 2012. They hope to expand to other NoVa locations in the future.
