Docket Item # 4  
BAR CASE #2010-0118  
BAR Meeting  
June 16, 2010  

**ISSUE:** Alterations  

**APPLICANT:** Old Town Windows and Doors for Joseph Costa  

**LOCATION:** 610 South Columbus Street  

**ZONE:** CD/Commercial  

---  

**STAFF RECOMMENDATION:** Staff recommends approval of the application as submitted.

---  

**EXPIRATION OF APPROVALS NOTE:** In accordance with Sections 10-106(B) and 10-206(B) of the Zoning Ordinance, any official Board of Architectural Review approval will expire 12 months from the date of issuance if the work is not commenced and diligently and substantially pursued by the end of that 12-month period.

**BUILDING PERMIT NOTE:** Most projects approved by the Board of Architectural Review require the issuance of one or more construction permits by Building and Fire Code Administration (including signs). The applicant is responsible for obtaining all necessary construction permits after receiving Board of Architectural Review approval. Contact Code Administration, Room 4200, City Hall, 703-838-4360 for further information.
I. ISSUE
The applicant is requesting approval of a Certificate of Appropriateness for replacement doors and windows at 610 South Columbus Street.

The applicant is requesting approval to replace a total of 17 windows; ten on the front of the home facing South Columbus Street and seven on the side elevation facing the parking lot. The existing windows are single-glazed, double-hung, six-over-six, wood windows with exterior storms. The applicant is requesting approval of Marvin Ultimate Wood Double Hung double-glazed windows with 7/8” muntins. The proposed windows will be simulated divided light with an interior spacer and an identical light pattern to the window they are replacing.

The applicant is also requesting approval of a replacement front entry door and a set of French doors on the second floor of the side elevation. The existing front door is a traditional six paneled wood door which is to be replaced with a new, Rogue Valley, wood, six paneled door. This new wood, door will be protected with a new metal storm door which will match the existing storm to be removed. The existing French doors, located on the second floor of the North elevation, will be replaced with a new, wood, simulated divided light French door.

II. HISTORY
610 S. Columbus Street is part of the Washington Square Townhouse development built in 1979. This 3-1/2 story brick townhouse is detailed with two gable roof dormers and 6/6 single glazed wood windows. The front door is a wood raised panel door with single light metal storm flanked by paneled, three-light sidelights.

III. ANALYSIS
The proposed alterations comply with Zoning Ordinance requirements.

The Design Guidelines recommend that: “…replacement windows should be appropriate to the historic period of the architectural style of the building”. The Guidelines state that single-glazed, true divided light windows with interior storm sash are the preferred replacement window type. The Guidelines continue by saying other acceptable window types are “double-glazed true divided light wood windows….” In this particular case, double-glazed windows, which were commercially available when this townhouse was constructed in 1979, are appropriate replacement windows and significantly more attractive than the existing single glazed windows covered by aluminum storm panels. Staff further believes that the appearance of modern simulated divided light windows is indistinguishable from true divided light sash and allows the profile of the muntins to be thinner and more historically accurate.

Therefore, given the age of the townhouse and the fact that the existing 6/6 light pattern and putty glazed muntin profile and size will be retained, Staff does not object to the installation of painted wood double-insulated windows and doors, with simulated divided lights, and dark colored interior spacer bars. Staff finds the proposed replacement windows appropriate and compatible with nearby buildings of historic merit.

Additionally, the Guidelines identify “Doors and their surrounds…as much a character defining
feature of architectural styles as windows,” and notate that, “Exterior doors and storm doors constitute prominent visual details of the main façade of a building.” Based on these findings, Staff has evaluated the proposed replacement door as appropriate and in keeping with the historic integrity of the district and notes that the overall door proposal maintains continuity in windows and door styles and materials in the Washington Square development.

IV. STAFF RECOMMENDATION
Staff recommends approval of the application as submitted.

STAFF:
Michele Oaks, Historic Preservation Planner, Planning & Zoning
Al Cox, FAIA, Historic Preservation Manager, Planning & Zoning
