

Docket Item #10  
BAR CASE# 2004-0262

BAR Meeting  
December 15, 2004

**ISSUE:** Demolition  
**APPLICANT:** Melanie El-Sabaawi  
**LOCATION:** 513 South Royal Street  
**ZONE:** RM/Residential

---

### **STAFF RECOMMENDATION:**

Staff recommends approval of the application with the following conditions:

1. Call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds; and,
2. The above statement must appear in the General Notes of the site plan so that on-site contractors are aware of the requirement.

NOTE: This docket item requires a roll call vote.

### **I. ISSUE:**

The applicant is requesting approval of a Permit to Demolish and Capsulate portions of the residential rowhouse at 513 South Royal Street. The areas to be demolished include rear (west) of the first story of the existing house to allow construction of an addition and portions of the rear (west) gable roof to permit construction of a dormer.

The rear of the house is not visible from a public right-of-way.

### **II. HISTORY:**

513 South Royal Street is a three story brick veneer rowhouse and is one of a group of ten rowhouses constructed on the site of the old Alexandria Iron Works in 1964.

This case is virtually identical to one that the Board considered earlier this year for one of the other houses in the row which requested approval of demolition of the rear of the house to permit the construction of an addition. That case was approved by the Board in August (BAR Case #2004-00117, 8/17/04).

### **III. ANALYSIS:**

The proposed encapsulation/demolition complies with zoning ordinance requirements. Note: Recommend that applicant submit proposed rear addition to confirm compliance with zoning ordinance requirements before proceeding with demo/encapsulation.

In considering a Permit to Demolish/Capsulate, the Board must consider the following criteria set forth in the Zoning Ordinance, §10-105(B):

- (1) Is the building or structure of such architectural or historical interest that its moving, removing, capsulating or razing would be to the detriment of the public interest?
- (2) Is the building or structure of such interest that it could be made into a historic house?
- (3) Is the building or structure of such old and unusual or uncommon design, texture and material that it could not be reproduced or be reproduced only with great difficulty?
- (4) Would retention of the building or structure help preserve the memorial character of the George Washington Memorial Parkway?
- (5) Would retention of the building or structure help preserve and protect an historic place or area of historic interest in the city?
- (6) Would retention of the building or structure promote the general welfare by

maintaining and increasing real estate values, generating business, creating new positions, attracting tourists, students, writers, historians, artists and artisans, attracting new residents, encouraging study and interest in American history, stimulating interest and study in architecture and design, educating citizens in American culture and heritage, and making the city a more attractive and desirable place in which to live?

Given the fact that this is a late 20<sup>th</sup> century residential building, it is the opinion of Staff that none of the criteria are met in this instance.

Staff notes the comments of Alexandria Archaeology and has included them as a condition.

**IV. STAFF RECOMMENDATION:**

Therefore, Staff recommends approval of the application with the following conditions:

1. Call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds; and,
2. The above statement must appear in the General Notes of the site plan so that on-site contractors are aware of the requirement.

## CITY DEPARTMENT COMMENTS

Legend: C - code requirement R - recommendation S - suggestion F- finding

### Code Enforcement:

- C-1 All exterior walls within 5 feet from an interior property line shall have a fire resistance rating of 1 hour, from both sides, with no openings permitted within the wall. As alternative, a 2 hour fire wall may be provided. This condition is also applicable to skylights within setback distance.
  
- C-2 Prior to the issuance of a demolition permit or land disturbance permit, a rodent abatement plan shall be submitted to Code Enforcement that will outline the steps that will taken to prevent the spread of rodents from the construction site to the surrounding community and sewers.
  
- C-3 Roof drainage systems must be installed so as neither to impact upon, nor cause erosion/damage to adjacent property.
  
- C-4 New construction must comply with the current edition of the Uniform Statewide Building Code (USBC).
  
- C-5 Alterations to the existing structure must comply with the current edition of the Uniform Statewide Building Code (USBC).
  
- C-6 Construction permits are required for this project. Plans shall accompany the permit application that fully detail the construction as well as layouts and schematics of the mechanical, electrical, and plumbing systems.

### Historic Alexandria:

No comment.

### Alexandria Archaeology:

- F-1 Tax records indicate that a free African American household was present on this street face in 1810, but the exact address in not known. The G.M. Hopkins City Atlas of Alexandria shows several residences present in the vicinity in 1877. The property therefore has the potential to yield archaeological resources that could provide insight into domestic activities of Alexandria's free black population in the early nineteenth century.
  
- R-1 Call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds.
  
- R-2 The above statement must appear in the General Notes of the site plan so that on-site contractors are aware of the requirement.
