

Docket Item # 5
BAR CASE # 2007-0212

BAR Meeting
February 27, 2008

ISSUE: Demolition/Encapsulation

APPLICANT: Koy Banks

LOCATION: 1113 Queen Street

ZONE: CL/Residential

STAFF RECOMMENDATION: Staff recommends approval of the application as submitted with the following conditions:

1. The applicant/developer shall call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds.
2. The applicant/developer shall not allow any metal detection to be conducted on the property, unless authorized by Alexandria Archaeology.
3. The statements in Conditions 1 and 2 above shall appear in the General Notes of all site plans and on all site plan sheets that involve demolition or ground disturbance (including Erosion and Sediment Control, Grading, and Sheeting and Shoring) so that on-site contractors are aware of the requirements. Additional statements to be included on the Final Site Plan will be determined in consultation with Alexandria Archaeology.

****EXPIRATION OF APPROVALS NOTE:** In accordance with Sections 10-106(B) and 10-206(B) of the Zoning Ordinance, any official Board of Architectural Review approval will expire 12 months from the date of issuance if the work is not commenced and diligently and substantially pursued by the end of that 12-month period.

****BUILDING PERMIT NOTE:** Most projects approved by the Board of Architectural Review require the issuance of one or more construction permits by the Code Enforcement Bureau (including signs). The applicant is responsible for obtaining all necessary construction permits after receiving Board of Architectural Review approval. Contact Code Enforcement, Room 4200, City Hall, 703-838-4360 for further information.

(Insert sketch here)

NOTE: This docket item requires a roll call vote.

I. ISSUE:

The applicant is requesting approval of a Permit to Demolish/Encapsulation to allow for the construction of a two story addition to the existing house at 1113 Queen Street. The existing rear one story addition and a two-story ell will be completely demolished. The amount of demolition has an approximate footprint of 17.5' x 10.1' or 176.75 square feet. The proposed new addition will completely encapsulate the rear wall of the original part of the house. The proposed new addition will have a footprint of 17.7' x 29.9' or 529.23 square feet. The front elevation of the existing house will remain as is.

The back of the house is visible from the alley that runs east-west between North Henry Street and North Fayette Street. The side of the house has direct views on the west elevation from Queen Street due to vacant lots adjacent on the west.

II. HISTORY:

1113 Queen Street appears on the 1896 Sanborn maps as a 2 story dwelling. Later Sanborn maps show a series of rear additions, which by 1907 appear to be incorporated as an ell addition to the main building. Building permit records show building activity occurring at 1113 Queen Street in 1926. It appears from the Sanborn maps that the current rear addition configuration was constructed after 1958. Staff feels that the original house would have been wood, in keeping with similar houses constructed at the turn-of-the century in Parker-Gray. At a later date, the front was altered to its current permastone materials appearance, and stucco was added to the side elevations.

Staff did not locate any prior approvals by the Board for this address.

The applicants received a side yard setback variance from the Board of Zoning Appeals on November 8, 2007 (BZA Case #2007-0035) for the proposed addition.

III. ANALYSIS:

In considering a Permit to Demolish or Capsulate, the Board must consider the following criteria set forth in the Zoning Ordinance, Sec. 10-205(B):

- (1) Is the building or structure of such architectural or historical interest that its moving, removing, capsulating or razing would be to the detriment of the public interest?
- (2) Is the building or structure of such interest that it could be made into a historic house?
- (3) Is the building or structure of such old and unusual or uncommon design, texture and material that it could not be reproduced or be reproduced only with great difficulty?
- (4) Would retention of the building or structure help preserve and protect an historic place or area of historic interest in the city?
- (5) Would retention of the building or structure promote the general welfare by maintaining and increasing real estate values, generating business, creating new positions, attracting tourists, students, writers, historians, artists and artisans, attracting

new residents, encouraging study and interest in American history, stimulating interest and study in architecture and design, educating citizens in American culture and heritage, and making the city a more attractive and desirable place in which to live?

(6) Would retention of the building or structure help maintain the scale and character of the neighborhood?

In the opinion of Staff, the proposed demolition and encapsulation do not rise to the level of the above criteria. The rear additions proposed to be demolished appear to have been constructed after 1958. In addition, the integrity of these additions have been compromised due to the use of stucco on the side elevations. Therefore, Staff has no objection to the proposed demolition and encapsulation, but does note the comments of Alexandria Archaeology and recommends that they be included as a condition of the approval.

IV. STAFF RECOMMENDATION:

Staff recommends approval of the application as submitted with the following conditions:

1. The applicant/developer shall call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds.
2. The applicant/developer shall not allow any metal detection to be conducted on the property, unless authorized by Alexandria Archaeology.
3. The statements in Conditions 1 and 2 above shall appear in the General Notes of all site plans and on all site plan sheets that involve demolition or ground disturbance (including Erosion and Sediment Control, Grading, and Sheeting and Shoring) so that on-site contractors are aware of the requirements. Additional statements to be included on the Final Site Plan will be determined in consultation with Alexandria Archaeology.

CITY DEPARTMENT COMMENTS

Legend: C - code requirement R - recommendation S - suggestion F- finding

Code Enforcement:

- C-1 Prior to the issuance of a demolition permit or land disturbance permit, a rodent abatement plan shall be submitted to Code Enforcement that will outline the steps that will be taken to prevent the spread of rodents from the construction site to the surrounding community and sewers.
- C-2 Before a building permit can be issued on any proposed future alterations, a certification is required from the owner or owner's agent that the building has been inspected by a licensed asbestos inspector for the presence of asbestos (USBC 110.3).
- C-3 Construction permits are required for this project. Plans shall accompany the permit application that fully details the construction as well as layouts and schematics of the mechanical, electrical, and plumbing systems.
- C-4 New construction must comply with the current edition of the Uniform Statewide Building Code (USBC).
- C-5 Alterations to the existing structure must comply with the current edition of the Uniform Statewide Building Code (USBC).
- C-6 Alterations to the existing structure and/or installation and/or altering of equipment therein requires a building permit. Five sets of plans, bearing the signature and seal of a design professional registered in the Commonwealth of Virginia, must accompany the written application. The plans must include all dimensions, construction alterations details, kitchen equipment, electrical, plumbing, and mechanical layouts and schematics.
- C-7 Sheeting and shoring shall not extend beyond the property line; except when the developer has obtained a written release from adjacent property owners which has been recorded in the land records; or through an approved encroachment process.
- C-8 Permission from adjacent property owners is required if access to the adjacent properties is required to complete the proposed construction. Otherwise, a plan shall be submitted to demonstrate the construction techniques utilized to keep construction solely on the referenced property.
- C-9 Roof drainage systems must be installed so as neither to impact upon, nor cause erosion/damage to adjacent property.
- C-10 All exterior walls within 5 feet from an interior property line shall have a fire resistance rating of 1 hour, from both sides of the wall. As alternative, a 2 hour fire wall may be provided. This condition is also applicable to skylights within setback distance. Openings in exterior walls between 3 and 5 feet shall not exceed 25% of the area of the

entire wall surface (This shall include bay windows). Openings shall not be permitted in exterior walls within 3 feet of an interior lot line.

- C-11 A soils report must be submitted with the building permit application.
- C-12 A wall location plat prepared by a land surveyor is required to be submitted to this office prior to requesting any framing inspection.

Historic Alexandria:

Approval. Replace Hardi-plank with wood siding.

Alexandria Archaeology:

Archaeology

Historical maps indicate the presence of 19th-century houses in the vicinity of this property. There is the potential for archaeological resources to be present that could provide insight into residential life in early Alexandria.

Conditions

1. The applicant/developer shall call Alexandria Archaeology immediately (703-838-4399) if any buried structural remains (wall foundations, wells, privies, cisterns, etc.) or concentrations of artifacts are discovered during development. Work must cease in the area of the discovery until a City archaeologist comes to the site and records the finds.
2. The applicant/developer shall not allow any metal detection to be conducted on the property, unless authorized by Alexandria Archaeology.
3. The statements in Conditions 1 and 2 above shall appear in the General Notes of all site plans and on all site plan sheets that involve demolition or ground disturbance (including Erosion and Sediment Control, Grading, and Sheeting and Shoring) so that on-site contractors are aware of the requirements. Additional statements to be included on the Final Site Plan will be determined in consultation with Alexandria Archaeology.
4. If this project is a federal undertaking or involves the use of any federal funding, the applicant shall comply with federal preservation laws, in particular Section 106 of the National Historic Preservation Act of 1966. The applicant will coordinate with the Virginia Department of Historic Resources and the federal agency involved in the project, as well as with Alexandria Archaeology.
